

# HTMLtoXML Converter Software

## Version e1.11 – 09 June 2009

### Release Notes

Version e1.11 is a full installation of HTMLtoXML Converter.

#### **System Requirements:**

##### **1. Hardware requirements**

- (1) Processor (CPU): Pentium III 1 GHz  
(or x86-compatible 32-bit CPU with comparable or higher performance)
- (2) Hard disk space: 40 GB (with at least 4 GB of available space)
- (3) Memory (RAM): 256 MB plus the memory required by the host operating system
- (4) Display: 1024x768 pixels (256 colors, minimum)

##### **2. Software requirements**

###### **2.1 The software runs on the following operating systems:**

- (1) Microsoft Windows® XP  
Home Edition/Professional SP3 (English)
- (2) Microsoft Windows® Vista  
Home Basic/Home Premium/Business/Ultimate SP1 (English)

###### **2.2 PCT-SAFE (optional)**

PCT-SAFE is required for Internet filing, retrieving order sheet files in XML, and other such operations. You can download PCT-SAFE from the following site:  
<http://www.wipo.int/pct-safe/en/download/>

###### **2.3 Adobe Acrobat and Adobe Reader (optional)**

Adobe Acrobat (sold separately) or Adobe Reader (free) is required for displaying and printing files.

\* You can download Adobe Reader for free from Adobe's website.

#### **<Precautions and restrictions>**

Before converting an HTML file, first save it to a write-enabled folder on the computer on which HTMLtoXML Converter is installed.

HTMLtoXML Converter cannot convert online HTML files, files in a path containing characters other than ASCII characters, and files in a write-protected folder.

Also, be sure to avoid sharing folders containing HTML files over your network.

##### **3. Installation instructions**

**JPOe111.exe** must be run to install the software. The program group "JPO\_INPIT" is created during installation. To start the application, click Start (or All Programs) > JPO\_INPIT > HTMLtoXML Converter.

[Update Log]

June 9, 2009 : The problem of HTMLtoXMLConverter concerning the maximum line was resolved.
