

Procedures to file a request to the JPO (Japan Patent Office) for Patent Prosecution Highway Pilot Program between the JPO and the IPOPHL (Intellectual Property Office of the Philippines)

Applicants can request accelerated examination by a prescribed procedure including submission of relevant documents on an application which is filed with the JPO and satisfies the following requirements under the JPO-IPOPHL Patent Prosecution Highway pilot program based on the IPOPHL application.

When filing a request for the PPH pilot program, an applicant must submit a request form "The Explanation of Circumstances Concerning Accelerated Examination" based on the procedure prescribed in "the Guidelines of the Accelerated Examination and Appeal."¹ Under the PPH pilot program, an applicant is not required to fill in the section "2. the disclosure of prior arts and comparison between the claimed invention and prior art" in "The Explanation of Circumstances Concerning Accelerated Examination".

The trial period of the PPH pilot program will commence on March 12, 2015 for a trial period duration of three years and ending on March 11, 2018. The trial period may be extended if necessary. The IPOPHL and the JPO review and assess the pilot at the time of extension.

1. Requirements

(a) Both the JPO application on which PPH is requested and the IPOPHL application(s) forming the basis of the PPH request shall have the same earliest date (whether this be a priority date or a filing date).

For example, the JPO application (including PCT national phase application) may be either: (Case I) an application which validly claims priority under the Paris Convention from the IPOPHL application(s) (examples are provided in ANNEX, Figures A, B, C, H, I and J), or (Case II) an application which provides the basis of a valid priority claim under the Paris Convention for the IPOPHL application(s) (including PCT national phase application(s)) (examples are provided in ANNEX, Figures D and E), or (Case III) an application which shares a common priority document with the IPOPHL application(s) (including PCT national phase application(s)) (examples are provided in ANNEX, Figures F, G, L, M and N), or (Case IV) a PCT national phase application where both the JPO application and the IPOPHL application(s) are derived from a common PCT international application having no priority claim (an example is provided in ANNEX, Figure K).

The pilot program is not applicable on the basis of IPOPHL 'utility model' applications.

(b) At least one corresponding application exists in the IPOPHL and has one or more

¹ http://www.jpo.go.jp/torikumi/t_torikumi/souki/pdf/v3souki/guideline.pdf

PPH using the national work products from the IPOPHL

claims that are determined to be patentable/allowable by the IPOPHL.

The corresponding application can be an application which provides the basis of the priority claim under the Paris Convention for the JPO application, an application which derived from the IPOPHL application which forms the basis of the priority claim (e.g. a divisional application of the IPOPHL application), or an IPOPHL national phase application of a PCT application.

Claims are “determined to be allowable/patentable” when the IPOPHL examiner clearly identifies the claims to be allowable/patentable in the latest office action, even if the application is not granted for patent yet. The office action may be either:

- (i) ...First Office Action
- (ii) ...Subsequent Office Action
- (iii)... Notice of Allowability
- (iv)...favorable Order on the appeal of final rejection

(c) All claims on file, as originally filed or as amended, for examination under the PPH must sufficiently correspond to one or more of those claims indicated as allowable in the IPOPHL.

Claims are considered to "sufficiently correspond" where, accounting for differences due to translations and claim format, the claims in the JPO are of the same or similar scope as the claims in the IPOPHL, or the claims in the JPO are narrower in scope than the claims in the IPOPHL.

In this regard, a claim that is narrower in scope occurs when an IPOPHL claim is amended to be further limited by an additional feature that is supported in the specification (description and/or claims).

A claim in the JPO which introduces a new/different category of claims to those claims indicated as allowable in the IPOPHL is not considered to sufficiently correspond. For example, where the IPOPHL claims only contain claims to a process of manufacturing a product, then the claims in the JPO are not considered to sufficiently correspond if the JPO claims introduce product claims that are dependent on the corresponding process claims.

Any claims amended or added after the grant of the request for participation in the PPH pilot program need not to sufficiently correspond to the claims indicated as allowable in the IPOPHL application.

(d) The JPO has not begun examination of the application at the time of request for the PPH (an example is provided in ANNEX, figure O).

2. Documents to be submitted

Documents (a) to (d) below must be submitted by attaching to “The Explanation of

Circumstances Concerning Accelerated Examination”.

Note that even when it is not needed to submit documents below, the name of the documents must be listed in “The Explanation of Circumstances Concerning Accelerated Examination” (Please refer to the Example form for the detail).

(a) Copies of all office actions (which are relevant to substantial examination for patentability in the IPOPHL), which were sent for the corresponding application by the IPOPHL, and translations of them² if they are not in English.

Either Japanese or English is acceptable as translation language.

(b) Copies of all claims determined to be patentable/allowable by the IPOPHL, and translations of them² if they are not in English.

Either Japanese or English is acceptable as translation language.

(c) Copies of references cited by the IPOPHL examiner

If the references are patent documents, the applicant doesn't have to submit them because the JPO usually possesses them. When the JPO does not possess the patent document, the applicant has to submit the patent document at the examiner's request. Non-patent literature must always be submitted.

The translations of the references are unnecessary.

(d) Claim correspondence table

The applicant requesting PPH must submit a claim correspondence table, which indicates how all claims in the JPO application sufficiently correspond to the patentable/allowable claims in the IPOPHL application.

When claims are just literal translation, the applicant can just write down that “they are the same” in the table. When claims are not just literal translation, it is necessary to explain the sufficient correspondence of each claim based on the criteria 1. (c) (Please refer to the Example form).

When the applicant has already submitted above documents (a) to (d) to the JPO through simultaneous or past procedures, the applicant may incorporate the documents by reference and does not have to attach them.

3. Example of “The Explanation of Circumstances Concerning Accelerated Examination” for filing request an accelerated examination under the PPH

² Machine translations will be admissible, but if it is impossible for the examiner to understand the outline of the translated office action or claims due to insufficient translation, the examiner can request the applicant to resubmit translations.

pilot program

(1) Circumstances

When an applicant files a request for an accelerated examination under the PPH pilot program to the JPO, an applicant must submit a request form “The Explanation of Circumstances Concerning Accelerated Examination” based on the procedure prescribed in “the Guidelines of the Accelerated Examination and Appeal”³.

The applicant must indicate that the application is included in (i) to (iii) of 1. (a), and that the accelerated examination is requested under the PPH pilot program. The application number, publication number, or a patent number of the corresponding IPOPHL application(s) also must be written.

*In the case that the application which has one or more claims that are determined to be patentable/allowable is different from the IPOPHL application(s) included in (i) to (iii) of 1. (a) (for example, the divisional application of the basic application), the application number, publication number, or a patent number of the application(s) which has claims determined to be patentable/allowable and the relationship between those applications also must be written.

(2) Documents to be submitted

The applicant must list all required documents mentioned above 2. in an identifiable way, even when applicant omits to submit certain documents.

(3) Notice

Forms of “The Explanation of Circumstances Concerning Accelerated Examination” are different between on-line procedure and paper procedure. Please refer to the examples of forms when filling in (“Form 1 for Accelerated Examination” for on-line procedures, and “Form 2 for Accelerated Examination” for paper procedures.).

4. Procedure for the accelerated examination under the PPH pilot program

The JPO decides whether the application can be entitled to the status for an accelerated examination under the PPH when it receives a request with the documents stated above.

When the JPO decides that the request is acceptable, the application is assigned a special status for an accelerated examination under the PPH.

In those instances where the request does not meet all the requirements set forth above, the

³ http://www.jpo.go.jp/torikumi/t_torikumi/souki/pdf/v3souki/guideline.pdf

PPH using the national work products from the IPOPHL

applicant will be notified and the defects in the request will be identified. Before the issue of the notification of not assigning a special status for accelerated examination under the PPH, the applicant will be given opportunity to submit missing documents. Even after the issue of the notification of not assigning a special status for accelerated examination under the PPH, the applicant can request the PPH again.

Example form of on-line procedures

(Example of the request based on the claims indicated patentable/allowable in the written opinion of the report on the state of the art)

<p>【書類名】 早期審査に関する事情説明書 The name of this paper</p>	<p>Bibliographical items</p>
