

I. Basics of Prior Art Search

**II. Search Strategy**

III. Search Tool - J-PlatPat

IV. Search Tool - PATENTSCOPE

### A. Search Flow

### B. Decision of search scope - 1/7

#### Accessible Documents

Step 1. Recognize an invention

Step 2. Determine outer border of search scope

Step 3. Determine search scope

Step 4. Change search scope

### B. Decision of search scope - 2/7

#### ~ Step 3. Determination of search scope ~

*Search scope having all the elements of the claimed invention*

~ **Example** ~

### B. Decision of search scope - 3/7

#### ~ Step 4. Change of search scope ~

**Expansion or Shift of search scope**

**Expansion**

- ✓ Generalization of element(s)
- ✓ Deletion of element(s)

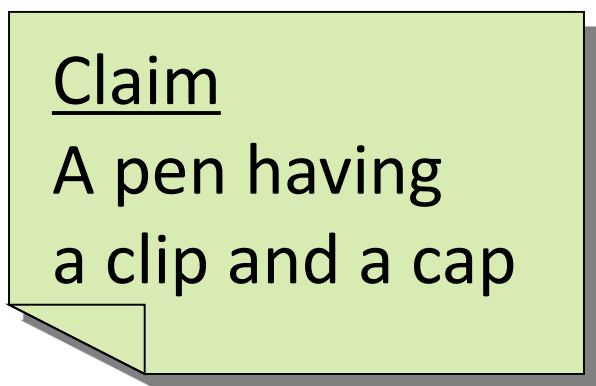

**Shift**

- ✓ Neighboring technical field(s)

### B. Decision of search scope - 4/7

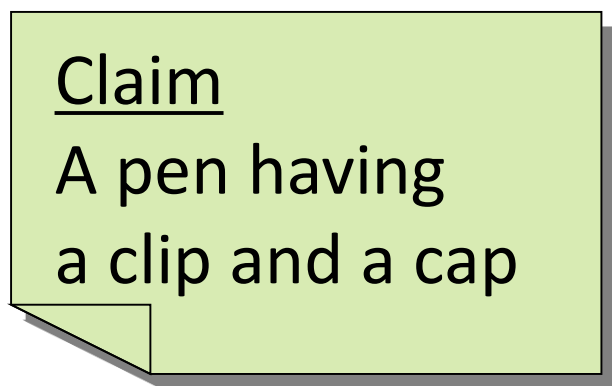

#### ~ Step 4. 1. Expansion of search scope ~

- ✓ Generalization of element(s)
  - **A writing instrument** having a clip and a cap
- ✓ Deletion of element(s)
  - A pen **having a cap**
  - A pen **having a clip**

### B. Decision of search scope - 5/7

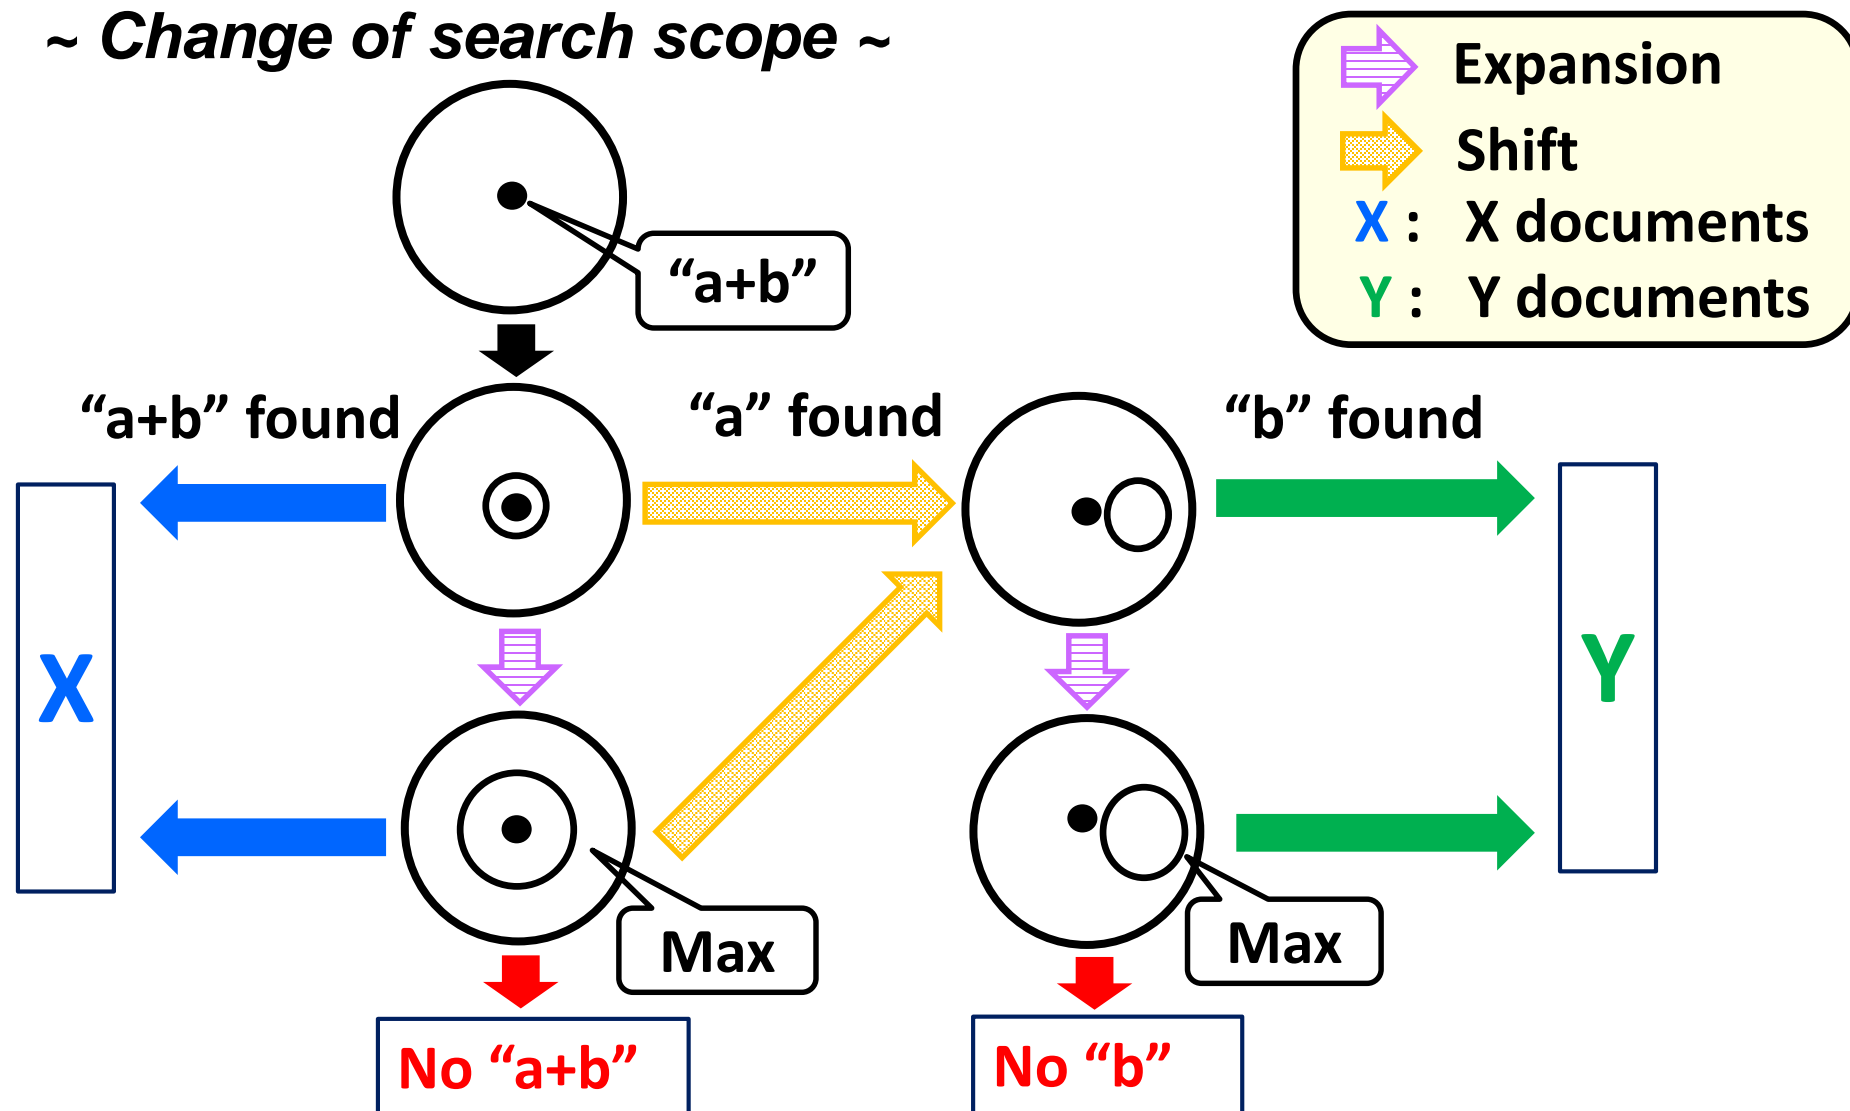

#### ~ Step 4. 2. Shift of search scope ~

- ✓ Neighboring technical field
  - **An electronic stylus**  
having a clip and a cap

### B. Decision of search scope - 6/7

~ *Change of search scope* ~

### B. Decision of search scope - 7/7

~ *Tips for more efficient search* ~

#### Claim

A pen having  
a clip and a cap

#### Embodiment

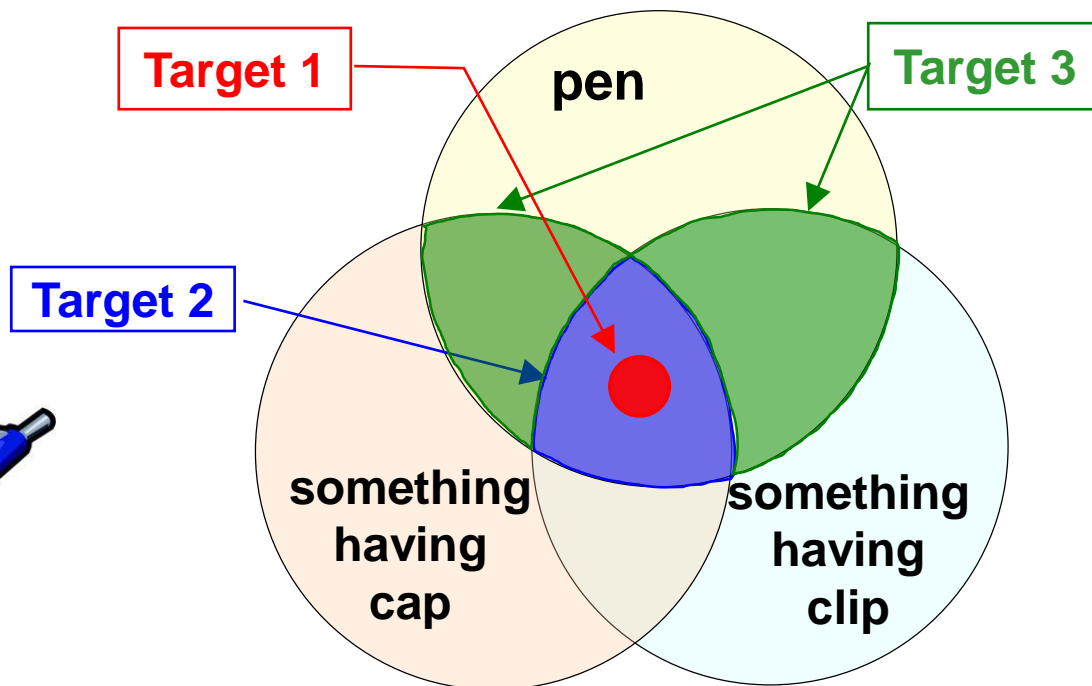

A *ball-point* pen  
having a clip and  
a cap

**Target 1:** A *ball-point* pen having a clip and a cap

**Target 2:** A pen having a clip and a cap

**Target 3:** A pen having a clip ( prior art 1) and  
another pen having a cap ( prior art 2)

### C. Decision of database

*~ How to select database ? ~*

- Basic inventions and academic inventions of element(s)
  - Patent Gazette
  - Papers by using Commercial DB and Internet
- The fields where specific search tools have been established
  - CAS for compounds
  - ICIREPAT for metal alloys
- Improvement invention
  - Patent Gazette

### D. Decision of search formulae - 1/3

- Search formulae are created based on search scope and database
- **Search scope** determines the contents of search formulae.
  - When search scope is “**pen** AND **clip** AND **cap**”, search formulae can be “**(pen\*clip\*cap)/tx**”.
- **Database** determines the description methods of search formulae.
  - When classification(IPC) is assigned to documents in the database, search formulae whose search scope is “**pen** AND **clip** AND **cap**” can be “**B43K9/00 \* clip/tx**” (B43K9/00 : Cap for pen)

### D. Decision of search formulae - 2/3

~ *Tips for keyword search* ~

#### Claim

A pen having  
a clip and a cap

Search formulae : ***(pen\*clip\*cap)/tx***

#### ■ Synonym

➤ ***(pen\*[clip+pin]\*cap)/tx***

(“pin” is a synonym of “clip”)

#### ■ Proximity

➤ ***{pen,clip,cap},10n/tx***

(“pen” and “clip” and “cap” are within 10 words)

### D. Decision of search formulae - 3/3

#### ~ *Tips for classification search* ~

#### Claim

A pen having  
a clip and a cap

- When classification is not available...

- ***(pen\*clip\*cap)/tx***

- When IPC is available...

- ***B43K9/00\*clip/tx***

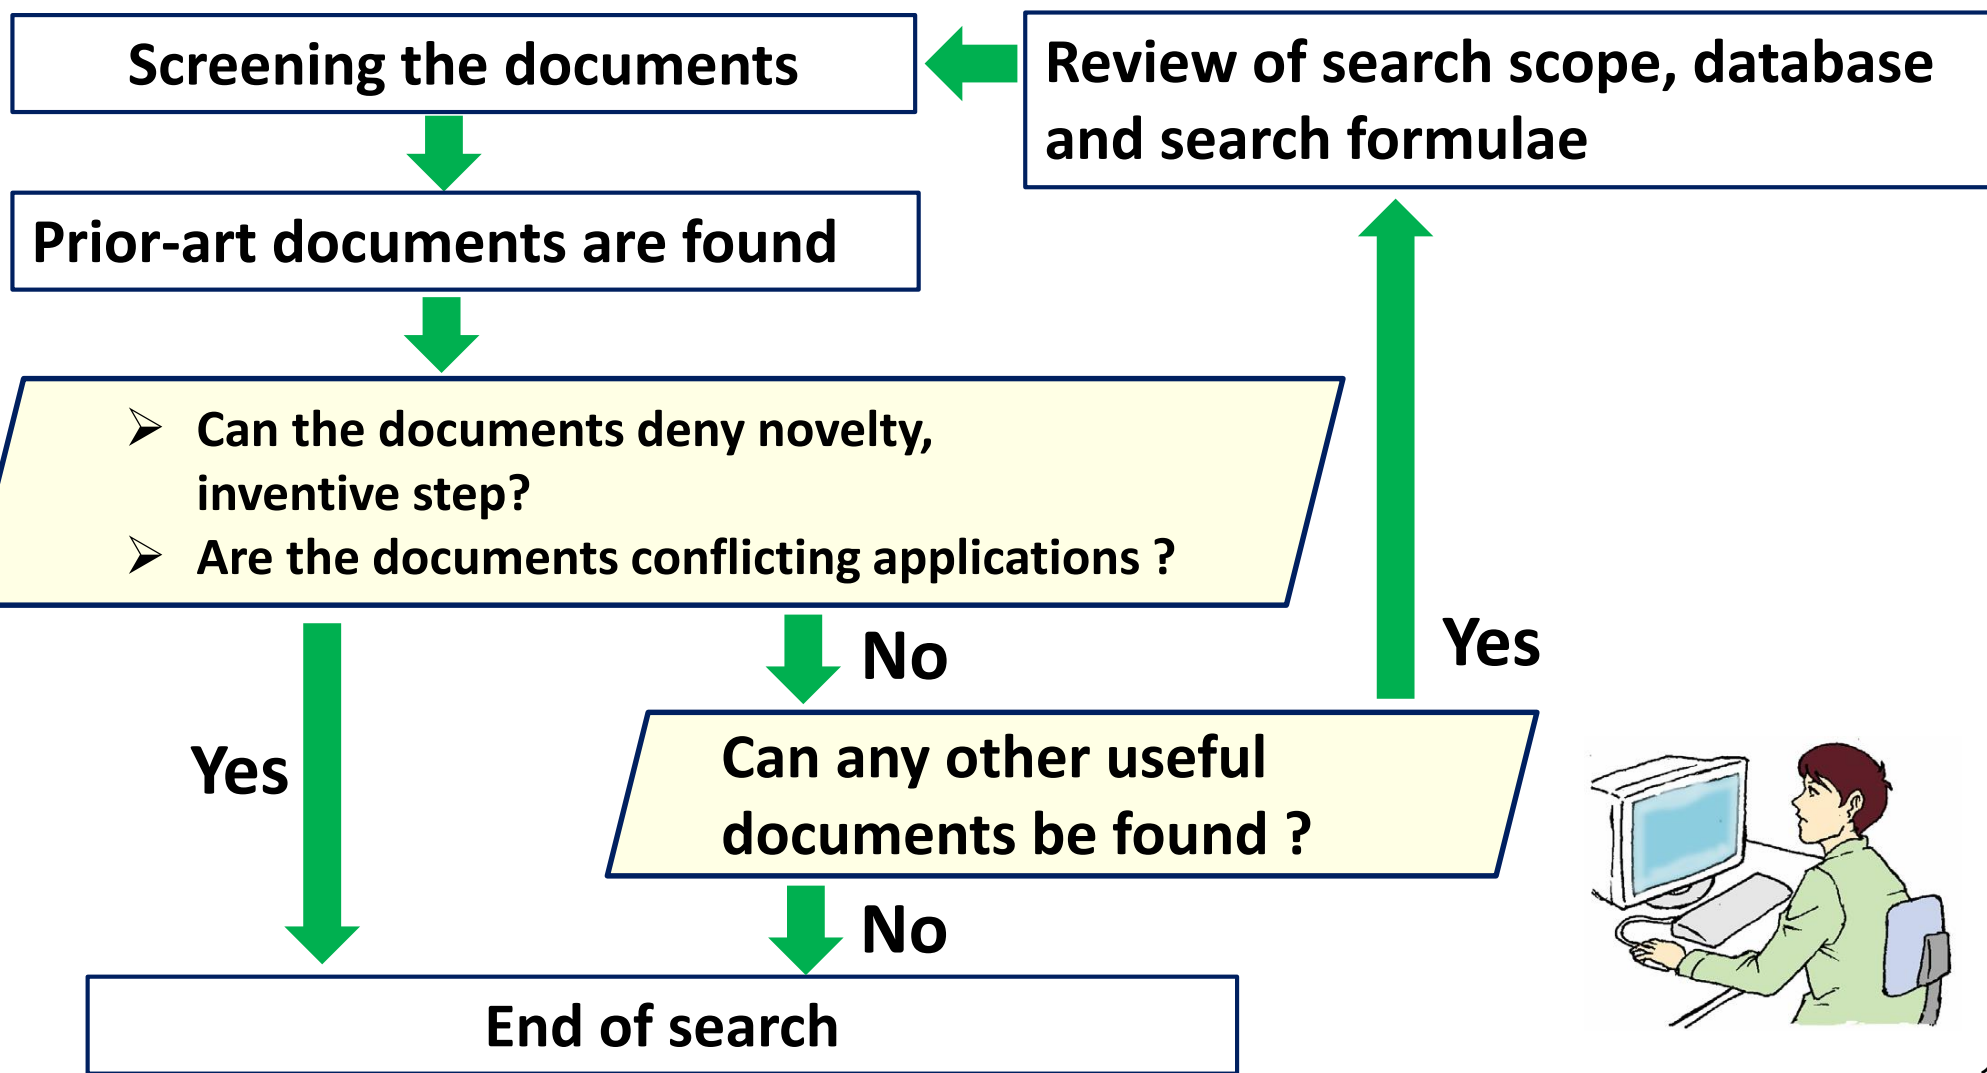

(IPC B43K9/00 : Cap for pen)

- When FI is available...

- ***B43K9/00@F***

(FI B43K9/00@F : Cap and clip for pen)

### E. Screening of search results - 1/3

### E. Screening of search results - 2/3

*~ When do you finish prior art search ? ~*

Cover ratio approaches 100 % as search time increases.

However, search time is limited for examiners...

\*The percentage of documents you have searched within the outer border of the search scope

### E. Screening of search results - 3/3

~ *When do you finish prior art search ?* ~

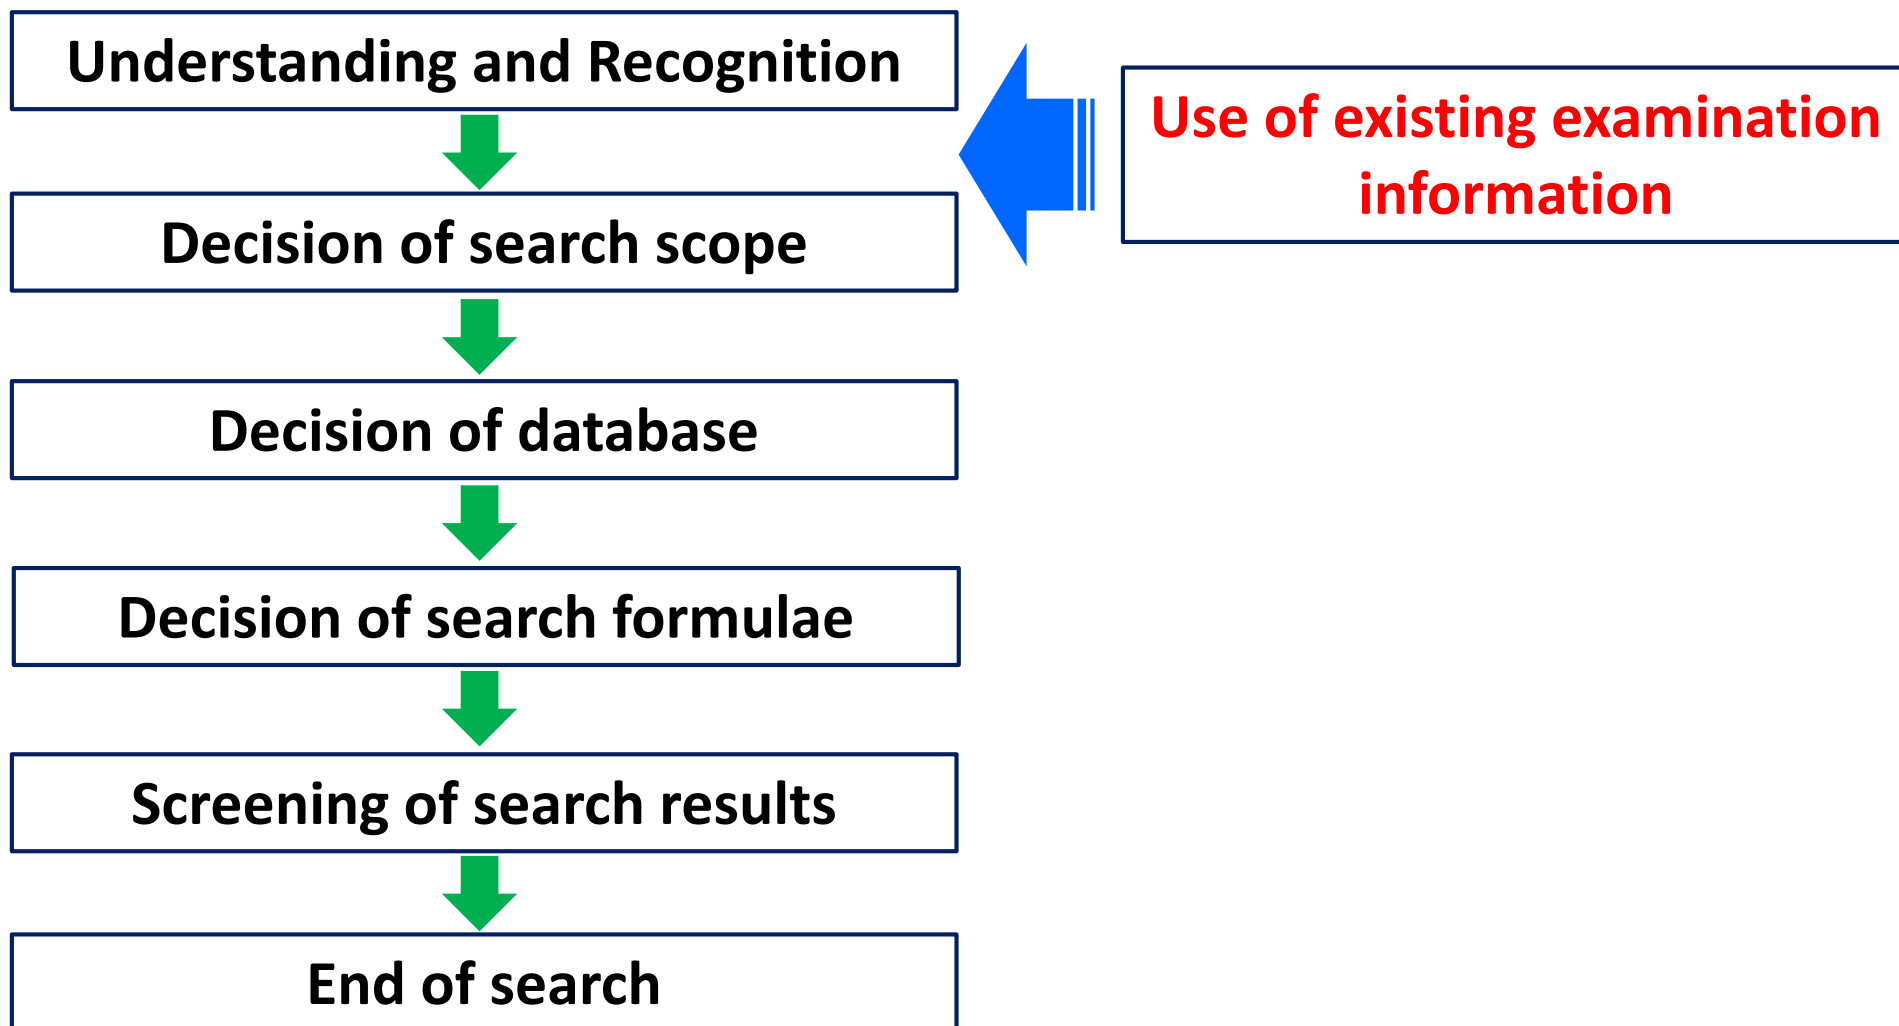

- Finish prior art search when an examiner judges that no more useful documents can be found.
  - ✓ The judgment is made based on the examiners' knowledge and experience.
  - ✓ Young examiners are recommended to consult with experienced examiners.

\*The percentage of documents you have searched within the outer border of the search scope

### F. Use of existing examination information - 1/3

### F. Use of existing examination information - 2/3

- Examination results of other patent offices
  - ISR
  - Examination results of JPO, EPO, ...
- Examination results of related applications
  - Divisional applications
- Miscellaneous
  - Same inventors or applicants

### F. Use of existing examination information - 3/3

- Use of existing examination information can reduce search time
