#### A. What are the ISR, the WOISA, and the IPER?

- International Search Report (ISR)
  - > The results of the international search are recorded in the International Search Report.
  - > The Search Report is published by the International Bureau.
  - ➤ The Search Report serves as a basis for any examination of the International application by the designated Offices.

(PCT Guidelines 16.01)

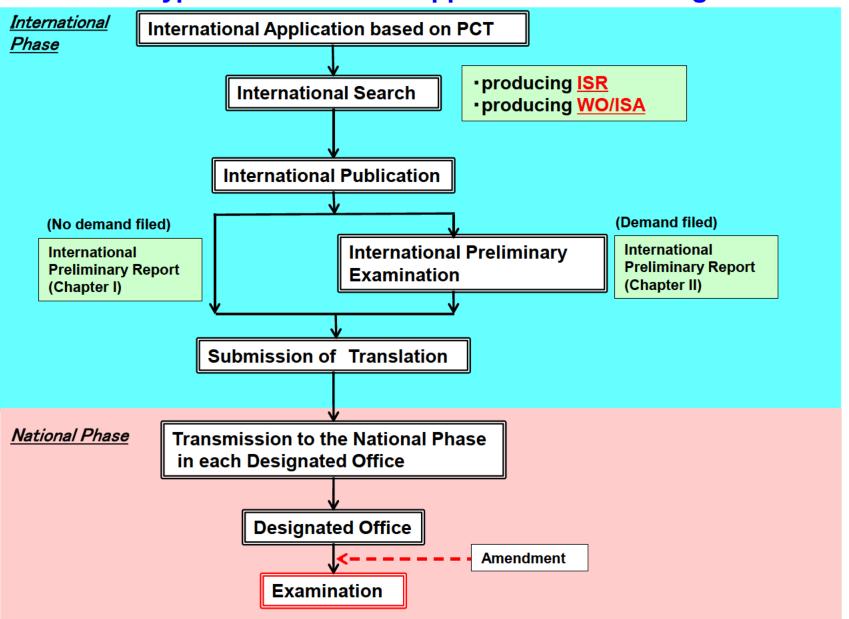

- Written Opinion of the International Searching Authority (WOISA)
   (International Preliminary Report on Patentability (Chapter I) (IPRP(I)))
  - Its primary role is to identify whether or not the claimed invention appears to be novel, involve an inventive step (be non-obvious) and be industrially applicable.

(PCT Guidelines 17.02)

- International Preliminary Examination Report (IPER)
   (International Preliminary Report on Patentability (Chapter II) (IPRP(II)))
  - Assuming that international preliminary examination is demanded, an IPER is drawn up at the end of the process of examination, taking into account amendments or observations that the applicant has made during the process.

(PCT Guidelines 17.08)

#### B. International Search Report(ISR)

- Basis of the Report
- Certain claims were found to be unsearchable
- Unity of invention is lacking

1. 1	1. Basis of the report					
a.	Wit	th regard to the language, the international search was carried out on the basis of	f:			
		the international application in the language in which it was filed.				
		a translation of the international application into	which is the language of			
		a translation furnished for the purposes of international search (Rules 12.3(a)	and 23.1(b)).			
Ъ.		This international search report has been established taking into account the re	ectification of an obvious mistake			
		authorized by or notified to this Authority under Rule 91 (Rule 43.6bis(a)).				
c.		With regard to any nucleotide and/or amino acid sequence disclosed in the inter	national application, see Box No. I			
2	~	Certain claims were found unsearchable (see Box No. II).				
3.	~	Unity of invention is lacking (see Box No. III).				

#### B. International Search Report(ISR)

- Observation where certain claims were found to be unsearchable.
  - The international application relates to a subject matter for which the ISA is not required to search (PCT Article 17(2)(a)(i))
    - Scientific and mathematical theories
    - Plant or animal varieties or essentially biological processes for the production of plants and animals, other than microbiological processes and the products of such processes
    - Schemes, rules or methods of doing business, performing purely mental acts, or playing games
    - Mere presentation of information
    - Computer programs to the extent that the ISA is not equipped to search prior art concerning such programs
  - ➤ The description, the claims, or the drawings fail to comply with the prescribed requirements to such an extent that a meaningful search cannot be carried out. (PCT Article 17(2)(a)(ii))
  - Multiple dependent claim referring to other multiple dependent claim (JPO allows)

Searchable MAY NOT required to search

Claim1 Claim3 Claim5

Claim4 Claim6

## **B. International Search Report(ISR)**

Observation where certain claims were found to be unsearchable.

- Observation where certain claims were round to be unscarchable.				
Box No.	II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)			
This inte	This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:			
1.	Claims Nos.: 8 because they relate to subject matter not required to be searched by this Authority, namely: The subject matter of claim 8 relates to a method of doing business, which does not require an international search by the International Searching Authority in accordance with PCT Article 17(2)(a)(i) and Rule 39.1(iii).			
2.	Claims Nos.: because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:			
3. 🗆	Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).			

#### **B. International Search Report(ISR)**

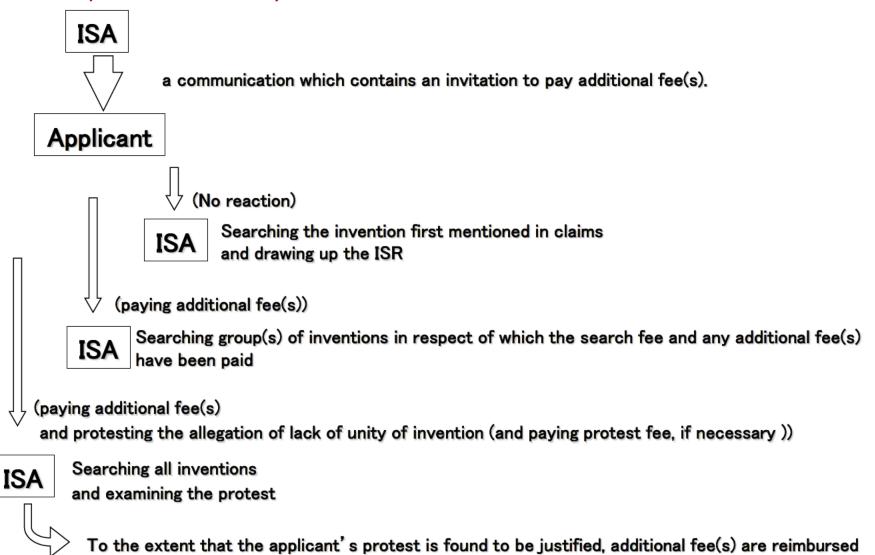

#### ■ Lack of Unity of Invention

- 1. The international application shall relate to one invention only, or to a group of inventions so linked as to form a single general inventive concept ("requirement of unity of invention").
- 2. If the ISA determines that the international application does not comply with the requirement of unity of invention, it shall invite the applicant to pay additional fees.

#### Example

- Claim1: A process of manufacturing an apparatus comprising steps A and B
- Claim2 : Apparatus specifically designed for carrying out step A
- Claim3: Apparatus specifically designed for carrying out step B

If the ISA decides that the international application does not comply with the requirement of unity of invention:

#### ■ Observation where unity of invention is lacking

·	4 <b>1</b>
This International Searching Authority found multiple inventions in this international application, as follows: D1 (JP 987654 A) discloses an apparatus including "A". Therefore, claim 1 lack novelty over D1 and involves no special technical features. Thus there are 2 inventions in the claims of this application.  Note that claim1, which involves no special technical features, is grouped into invention 1.  (invention 1) claim 1-7, 9-15 (invention 2) claim 16-20	Basis
<ol> <li>As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.</li> <li>As all searchable claims could be searched without effort justifying additional fees, this Authority did not invite payment of additional fees.</li> <li>As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:</li> </ol>	Applicant's Reaction
4.  No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:	
Remark on Protest  The additional search fees were accompanied by the applicant's protest and, where applicable, the payment of a protest fee.  The additional search fees were accompanied by the applicant's protest but the applicable protest fee was not paid within the time limit specified in the invitation.	Remark of Protest

No protest accompanied the payment of additional search fees.

### B. International Search Report(ISR)

- Classification and Fields searched Not always identical
- Minimum documentation Searched
- Documentation Searched Other than Minimum Documentation
- Electronic Database Consulted

#### A. CLASSIFICATION OF SUBJECT MATTER

Int.Cl. G06Q50/00(2012.01)i

According to International Patent Classification (IPC) or to both national classification and IPC

#### B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

Int.Cl. G06Q50/00, G06Q10/00

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Published examined utility model applications of Japan 1922-1996

Published unexamined utility model applications of Japan 1971-2005

Registered utility model specifications of Japan 1996-2005

Published registered utility model applications of Japan 1994-2005

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

CA(STN), [?root?\*74/SX]

	$\boxtimes$	Box No. VIII	Certain observations on the international application			

#### C. Written Opinion of the International Searching Authority(WOISA)

■ Basis of the Written Opinion

Во	x No.	I Basis of this opinion	
1.		regard to the language, this opinion has been established on the basis of: the international application in the language in which it was filed.	
		a translation of the international application into translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).	which is the language of a

#### C. Written Opinion of the International Searching Authority(WOISA)

■ Priority

We need to consider whether or not the priority claim is valid.

# The validity of the priority claim has not been considered because the International Searching Authority does not have in its possession a copy of the earlier application whose priority has been claimed or, where required, a translation of that earlier application. This opinion has nevertheless been established on the assumption that the relevant date (Rules 43bis.1 and 64.1) is the claimed priority date. This opinion has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rules 43bis.1 and 64.1). Thus for the purposes of this opinion, the international filling date indicated above is considered to be the relevant date. Additional observations, if necessary:

#### ■ Non-Establishment of Opinion

Box No. III Non-establishment of opinion with regard to novelty, inventive step and industria	l applicability			
The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or to be industrially applicable have not been examined in respect of:				
the entire international application.				
✓ claims Nos. 8				
because:				
the said international application, or the said claims Nos. 8				
relate to the following subject matter which does not require an international search (specify):				
The subject matter of claim 8 relates to a method of doing busine	ss, which does not			
require an international search by the International Search				
accordance with PCT Article 17(2)(a)(i) and Rule 39.1(iii).	,,			
doordanee with for medicie it (2) (a) (i) and have ostitiii).				
the description, claims or drawings (indicate particular elements below) or said claims Nos.				
are so unclear that no meaningful opinion could be formed (specify):				
the claims, or said claims Nos.	are so inadequately supported			
by the description that no meaningful opinion could be formed (specify):				

#### ■ Lack of Unity of Invention

Box No. IV Lack of unity of invention
1. ✓ In response to the invitation (Form PCT/ISA/206) to pay additional fees the applicant has, within the applicable time limit:  □ paid additional fees. □ paid additional fees under protest and, where applicable, the protest fee. □ paid additional fees under protest but the applicable protest fee was not paid. □ not paid additional fees.  2. □ This Authority found that the requirement of unity of invention is not complied with and chose not to invite the applicant to invite the
pay additional fees.  3. This Authority considers that the requirement of unity of invention in accordance with Rule 13.1, 13.2 and 13.3 is  complied with.  not complied with for the following reasons:  D1 (JP 987654 A) discloses an apparatus including "A". Therefore, claim 1 lack novelt:
over D1 and involves no special technical features. Thus there are 2 inventions i the claims of this application.  Note that claim1, which involves no special technical features, is grouped intinvention 1.  (invention 1) claim 1-7, 9-15  (invention 2) claim 16-20
4. Consequently, this opinion has been established in respect of the following parts of the international application:  □ all parts. □ the parts relating to claims Nos. 1-7, 9-20

citations

The subject matters of claim 1-7 are not novel and do not involve an inventive step in view of D1 (see paragraph [0026]-[0030], figure 7) cited in the ISR.

The subject matters of claim 9-13 do not appear to involve an inventive step in view of D1 and D2 (see claim 1, figure 1) cited in the ISR. Employing the feature [...A...] disclosed in D2 to the invention of D1 in order to constitute the present invention would have been easily conceived by the person skilled in the art.

explanations

The subject matters of claim 14-20 are neither disclosed in any of the documents cited in the ISR nor obvious to a person skilled in the art. None of the prior art documents cited in the ISR describes [...B...], and it was not obvious for the person skilled in the art to employ that the technical feature [...B...], which presents advantageous effects in that [...C...].

#### C. Written Opinion of the International Searching Authority(WOISA)

- Certain Defects in the International Application
  - In the case when defects exist in the form or contents of the international application.

#### Box No. VII Certain defects in the international application

The following defects in the form or contents of the international application have been noted:

The term [...D...] used in the description (page 12, line 12) is not a technical term.

#### C. Written Opinion of the International Searching Authority(WOISA)

- Certain Observations on the International Application
  - the clarity of the claims, the description, and the drawing.
  - > The question whether the claims are fully supported by the description.

#### Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and awings or on the question whether the claims are fully supported by the description, are made:

The feature of claim 7 is not referred to in the description. Therefore, claim 7 is not supported by the description as required by Article 6.

Fig.1 is unclear. That is, it does not adequately indicate the invention of claim 7.
