

# International Symposium on Patent Examination Practices on AI-related Inventions

Wednesday, November 20, 2019, 10:00-17:00

## Overview

AI technologies can be used in a wide variety of areas, and the volume of patent filings on AI-related inventions grows rapidly.

In this symposium, experts from IP5 offices and more will get together and introduce their patent examination practices on AI-related inventions. Also, a panel with users will be held to discuss each office's decision points on the patentability, key points for users to acquire patent rights, and policy recommendation for raising the predictability to users of the patentability of their inventions.

### Venue

Sokairou Hall,  
National Graduate Institute for Policy Studies  
7-22-1 Roppongi, Minato-ku, Tokyo

### Capacity

300 people

### Registration

First come, first served

**No fee for participation**

# Program (tentative)

# Session 1

## Current status of protecting AI-related inventions in each country

# Session 2

## Appropriate protection for AI-related inventions from the business perspective

# Session 3

## Decision points for the eligibility of AI-related inventions

# Session 4

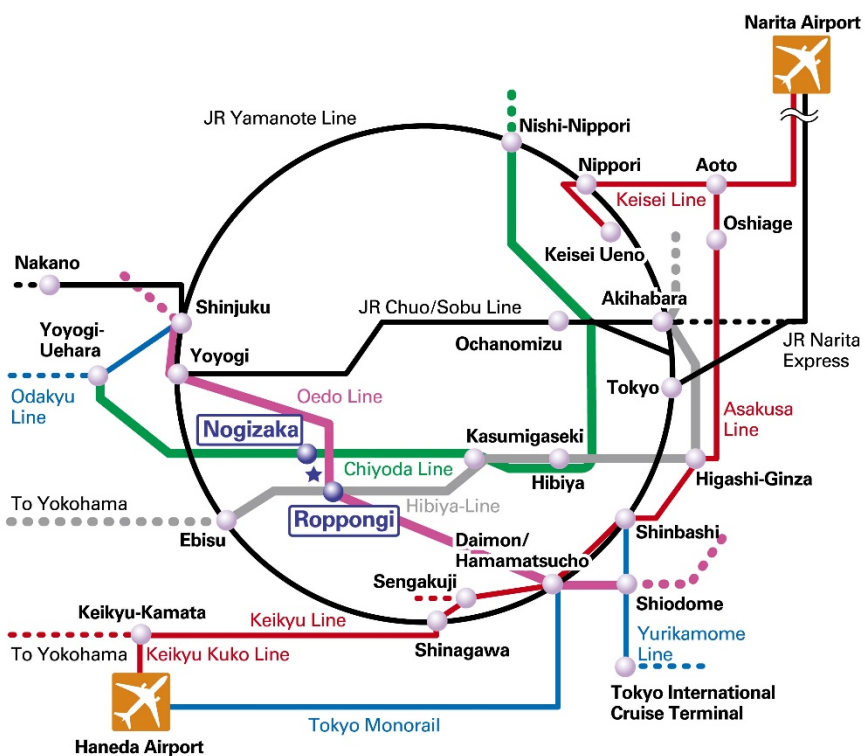

## Decision points for the inventiveness (non-obviousness) and the sufficiency of descriptions and claims

# Session 5

## Panel discussion on the strategy for acquiring patent protection for AI-related inventions and future perspective

- \* Including lunch break (11:45am-1:15pm)
- \* This program is subject to change.
