*: The system of publication of examined applications was abolished following introduction of the post-grant opposition system in April 1997. Accordingly, these figures cover statistics for the January-March period.

Note 1: The number of registrations include the number of renewal registrations and defensive mark registrations.

Note 2: The number of first actions indicates the number of first notices of examination results made by examiners - mainly a decision to grant a patent or notification of reasons for refusal - which were sent to applicants.

Note 3: In 1997, the number of first actions and other relevant numbers temporarily increased due to the abolishment of the system of publication of examined applications. In 1998, on the contrary, these numbers significantly decreased from the previous year because the multi-class application system was adopted this year and the JPO started examining/registering trademark applications under the newly introduced system.

Note: The figures indicate the number of rights. Figures in brackets indicate the total number of oppositions filed.

The post-grant opposition system was introduced for patents and utility models in January 1996, and for trademarks in April 1997. Due to the periods required for publication of gazettes and filing of oppositions, it was not until the end of the year of introduction that oppositions were filed on a full scale, and it was not until the following year trial examinations on oppositions actually started.
