(g) indicate explicitly, when it is not obvious from the description or nature of the invention, the way in which the invention is industrially applicable and the way in which it can be made and used, or, if it can only be used, the way in which it can be used.

(2) The manner and order specified in this Rule shall be followed except when, because of the nature of the invention, a different manner or a different order would result in a better understanding and a more concise presentation.

**Rule 6bis Patent Applications Relating to Micro-organisms**

**6bis. 1. Applications**

(1) The description of an invention in an application for a patent which requires for its performance the use of a micro-organism—
(a) which is not available to the public at the date of filing the application; and
(b) which cannot be described in the application in such a manner as to enable the invention to be performed by a person skilled in the art shall be regarded as disclosing the invention only if—
(i) not later than the date of filing of the application, a culture of the micro-organism has been deposited with an international depositary institution; and
(ii) the name of the depository institution, the date when the culture was deposited and file number of the deposit are given in the application, and, where a new deposit is made under paragraph 6bis.4 below, the applicant or proprietor makes a new deposit in accordance with that paragraph.

(2) Where the information specified under sub-paragraph (1)(b)(ii) above is not contained in the application as filed, it shall be submitted to the ARIPO Office,
(a) before the end of the period of 16 months after the date of filing of the application or, if priority is claimed, after the priority date.
(b) where the Office has received a request by any person for information and inspection of the application under Rule 3 of these Regulations, before the end of one month after the Office communicates to the applicant a notification of receipt of the request, whichever
period is the earliest.
(3) The submission of information specified in subparagraph (1)(b)(ii) above shall constitute the unreserved and irrevocable consent of the applicant to the depository institution with which a culture is from time to time deposited making the culture available on receipt of the certificate of the ARIPO Office authorizing the release to the person named therein as a person to whom the culture may be made available and who makes a valid request to depository institution.
(4) The application for a patent referred to in paragraph (1) above shall mention any international agreement under which the micro-organism concerned is deposited.

6bis. 2. Availability of Culture

(1) The deposited culture shall be available upon request to any person from the date of publication of the ARIPO patent application and to any person having the right to inspect the files under Rule 3 prior to that date. Subject to the provisions of paragraph (3) of Rule 6bis. 3 below, such availability shall be effected by the issue of a sample of the micro-organism to the person making the request (hereafter called “the requester”) and the said issue shall be made only if the requester has undertaken vis-à-vis the applicant or the proprietor of the patent-
(a) not to make the deposited culture or any culture derived therefrom available to any third party before the application has been refused or withdrawn or is deemed to be withdrawn or, if a patent is granted, before the expiry of the patent;
(b) to use the deposited culture or any culture derived therefrom for experimental purposes only, until such time as the patent application is refused or withdrawn or is deemed to be withdrawn or on the publication of the grant of the patent. This provision shall not apply where the requester is using the culture under a compulsory licence.
(2) For the purposes of paragraph (1) above, a derived culture is deemed to be any culture of the micro-organism which still exhibits those characteristics of the deposited culture which are essential to the carrying out of the invention. The undertaking referred to in paragraph (1) shall not impede a deposit of a derived culture which is necessary for the purpose of patent procedure.
(3) The request provided for in paragraph (1) shall be made to the ARIPO Office on a form recognised by the ARIPO Office. The ARIPO Office shall certify on the said form that an ARIPO patent application referring to the deposit of the micro-organism has been filed and that
the requester or the expert nominated by him is entitled to the issue of a sample of the micro-organism.

(4) The ARIPO Office shall transmit the request, together with the certification provided for in paragraph (3) above, to the depository institution as well as to the applicant or the proprietor of the patent.

(5) The Director General of the ARIPO Office shall publish in the Journal the list of depository institutions recognised for the purposes of this Rule.

6bis. 3. Availability of Culture to Experts

(1) Until the date of publication of the application, the applicant may inform the ARIPO Office that until the grant of the patent or until the date on which the application has been refused or withdrawn or is deemed to be withdrawn, the availability of the culture referred to in Rule 6bis.2 shall be effected only by the issue of a sample to an expert nominated by the requester.

(2) The following may be nominated as an expert:
(a) any natural person provided that the requester furnishes evidence at the time of filing the request that the nomination has the approval of the applicant;
(b) any natural person recognised as an expert by the Director General of the ARIPO Office.

(3) The nomination shall be accompanied by an undertaking from the expert vis-à-vis the applicant similar to that specified in Rule 6bis.2(1). In this instance the requester will be regarded as a third party.

6bis. 4. New Deposit of a Micro-organism

(1) If a micro-organism deposited in accordance with Rule 6bis.1 ceases to be available from the institution with which it was deposited because-
(a) the micro-organism is no longer viable, or
(b) for any other reason the depository institution is unable to supply samples, and if the micro-organism has not been transferred to another depository institution recognised for the purposes of Rule 6bis from which it continues to be available, an interruption in availability shall be deemed not to have occurred if a new deposit of the micro-organism originally deposited is made within a period of 3 months from the date on which the depositor was notified of the interruption by the depository institution and if a copy of the receipt of the deposit issued by the institution is forwarded to the ARIPO Office within 4
months from the date of the new deposit stating the number of the application or the ARIPO patent.

(2) In the case provided for in sub-paragraph (1)(a) above, the new deposit shall be made with the depository institution with which the original deposit was made; in the cases provided for in subparagraph (1)(b) above, it may be made with another depository institution recognised for the purposes of Rule 6bis.

(3) Where the institution with which the original deposit was made ceases to be recognised for the purposes of the application of Rule 6bis, either entirely or for the kind of micro-organisms to which the deposited micro-organism belongs, or where that institution discontinues, temporarily or definitively, the performance of its functions as regards deposited micro-organisms, and the notification referred to in paragraph (1) from the depository institution is not received within 6 months from the date of such event, the 3 months period referred to in paragraph (1) shall begin on the date on which this event is announced in the Journal of the ARIPO Office.

(4) Any new deposit shall be accompanied by a statement signed by the depositor alleging that the newly deposited micro-organism is the same as that originally deposited.

Rule 7 Claims

(1) The claims shall define the matter for which protection is sought in terms of the technical features of the invention. They shall be clear and concise and be supported by the description. The number of the claims shall be reasonable, taking into account the nature of the invention, and, where there are several claims, they shall be numbered consecutively in Arabic numerals. Wherever appropriate, claims shall contain-

(a) a statement indicating those technical features of the invention which are necessary for the definition of the latter but which, in combination, are part of the prior art; and

(b) a characterizing portion - preceded by the words "characterized in that," "characterized by," "wherein the improvement comprises," or any other words to the same effect - stating concisely the technical features which, in combination with the features stated under (a), it is desired to protect.

(2) Claims shall not, except where absolutely necessary, rely, in respect of the technical features of the invention, on references to the description or drawings. In particular, they shall not rely on such references as: "as described in part ... of the description," or
"as illustrated in figure ... of the drawings."

(3) Claims related to medical indications or use claims shall, for the purpose of examination, be drafted in accordance with the standard phrases provided below:

(a) Claims regarded as first medical indications
   (i) Pharmaceutical composition for the prophylaxis/treatment of Y (=disease) comprising X (= a drug/medicament).
   (ii) Pharmaceutical composition comprising X.
   (iii) Compound X for use as a drug/medicament for the treatment of Y.
   (iv) Use of X for the manufacture of a pharmaceutical composition (Note that the disease indication is not mentioned in the claim).
   (v) Compound X for use as an analgesic.
   (vi) Compound X for use in treating disease Y.
   (vii) Compound A containing X for use in treating disease Y (composition A may be genetically defined).
   (viii) Medicament containing compound X.
   (ix) Use of X for preparing a medicament.

(b) Claims regarded as second medical indications
   (i) Use of X for the manufacture/preparation of a medicament/pharmaceutical composition for the treatment of Y.
   (ii) Process for the preparation of a medicament for treating disease Y characterized in that compound X is used as the main active component of the medicament.

(4) (a) Any claim which includes all the features of one or more other claims (claim in dependent form, hereinafter referred to as "dependent claim") shall do so by a reference, if possible at the beginning, to the other claim or claims and shall then state the additional features claimed. Any dependent claim which refers to more than one other claim ("multiple dependent claim") shall refer to such claims in the alternative only. Multiple dependent claims shall not serve as a basis for any other multiple dependent claims.
   (b) Any claim stating the essential features of an invention may be followed by one or more claims concerning particular embodiments of that invention.
   (c) Claims shall be grouped in the most logical manner to facilitate comprehension of the scope of protection being sought.

(5) Where a group of inventions is claimed in an ARIPO patent application, the requirement of unity of invention under Section 2bis 1(a) shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression "special
technical features" shall mean those features which define a contribution which each of the claimed inventions considered as a whole makes over the prior art.

(6) The determination whether a group of inventions is so linked as to form a single general inventive concept shall be made without regard to whether the inventions are claimed in separate claims or as alternatives within a single claim.

(7) Without prejudice to Section 2bis (1)(a) of the Protocol, an ARIPO patent application may contain more than one independent claim in the same category (product, process, apparatus or use) only if the subject-matter of the application involves one of the following:

(a) a plurality of interrelated products,
(b) different uses of a product or apparatus,
(c) alternative solutions to a particular problem, where it is inappropriate to cover these alternatives by a single claim.

(8) Where the ARIPO patent application contains drawings including reference signs, the technical features specified in the claims shall preferably be followed by such reference signs relating to these features, placed in parentheses, if the intelligibility of the claim can thereby be increased. These reference signs shall not be construed as limiting the claim.

(e) ‘plant variety’ means any plant grouping within a single botanical taxon of the lowest known rank, which grouping, irrespective of whether the conditions for the grant of a plant variety right are fully met,
can be-

i defined by the expression of the characteristics that result from a given genotype or combination of genotypes,

ii distinguished from any other plant grouping by the expression of at least one of the said characteristics and,

iii considered as a unit with regard to its suitability for being propagated and changed;

(f) a process for the production of plants or animals is essentially biological if it consists entirely of natural phenomena such as crossing or selection.

7bis. 2. Patentable Biotechnological Inventions

Biotechnological inventions shall be patentable if they concern-

i 'biological material' which is isolated from its natural environment or produced by means of a technical process even if it previously occurred in nature,

ii 'plants or animals' provided that the technical feasibility of the invention is not confined to a particular plant or animal variety,

iii 'a microbiological or other technical process,' or a product obtained by means of such a process other than a plant or animal variety,

7bis. 3. Exceptions to Patentability of Biotechnological Inventions

ARIPO patents shall not be granted in respect of biotechnological inventions which, in particular, concern the following:

i processes for cloning human beings,

ii processes for modifying the germ line genetic identity of human beings,

iii uses of human embryos for industrial or commercial purposes,

iv processes for modifying the genetic identity of animals which are likely to cause them suffering without any substantial medical benefit to man or animal, and also animals resulting from such processes,

v an embryonic stem cell of an animal, an animal at the various stages of its formation and development such as a germ cell, a zoosperm, an embryo, etc., belong to the category of animal variety,

vi a single plant and its reproductive material (such as seed, etc.) which maintains its life by synthesizing carbohydrates and protein from the inorganic substances such as water, carbon dioxide and mineral salts and so on through photosynthesis belong to the category of plant variety,

vii inventions that do not possess practical applicability, i.e.
cannot easily be reproduced, vii the human body, at the various stages of its formation and development, and the simple discovery of one of its elements, including the sequence or partial sequence of a gene, cannot constitute patentable inventions.

Rule 8 Declaration of Priority

(1) The application may contain a declaration claiming, in respect of one or several designated States, the priority, as provided for in the Paris Convention, of one or more earlier national, regional or international applications filed by the applicant or his predecessor in title in or for any State party to the Paris Convention or Member of the World Trade Organisation. The declaration shall indicate

(i) the date of the earlier application;

(3) Where, at the time of filing the declaration referred to in paragraph (1), the number of the earlier application is not known, that number shall be furnished within 3 months from the date on which the application containing the declaration was filed.

(4) The applicant may correct the declaration of priority within 16 months from the earliest priority date claimed, or, where the correction would cause a change in the earliest priority date claimed, within 16 months from the corrected earliest priority date, whichever 16-month period expires first, provided that such a correction may be submitted until the expiry of 4 months from the date of filing accorded to the ARIPO patent application. In the case of industrial designs the period applicable shall be 10 months.

(5) The applicant shall, within a period of 3 months from the filing of the application containing the declaration, furnish a copy of the earlier application, certified as correct by the office with which it was filed.
(6) Where the earlier application is in a language other than English, the applicant shall, within a period of 6 months from the filing of the application containing the declaration, furnish an English translation.
