

## Standardized Data Specifications

XML Version

(Version 2.2)

## Major Changes

### Chapter 2 List of data item

List of data item: Refer to “Appendix”

### Chapter 3 Table of Code

B0070: Contents: Addition of the explanation made at the time of filing in plural number of countries to (1). Type & length, data format description have been modified according to the said change.

B0270: Addition of the following formats to national patent documents

- Code column (country code “JP”) + document type (2 digits) + “000” + sequence number (6 digits) in ③

JP cc 000 nnnnnn

- Code column (country code “JP”) + year (4 digits) + sequence number (6 digits) as ④

JP yyyy nnnnnn

Type & length, data format description have been modified according to the said changes.

Addition of “academic documents, etc.” in the remark

B0280: Addition of the following formats in the data format

- “JP” + document type + “000” + sequence number
- “JP” + year + sequence number

Type & length, data format description have been modified due to the said changes

The followings have been added as an example of the said data format in the remark and [Reference information]

- H△; Corrected patent specification
- I△; Corrected utility model specification
- [No document type]; PCT application

B0290: Addition of a comment in the explanation of code column

B0300: Addition of the description of “academic documents” in the data format

Addition of names by document type of non-patent CSDB and academic documents in the remark and [Reference Information]

B0440: Code INDEX deleted

C0840: Code symbols added

- A244001

- A792
- A8431
- A845
- A8451
- A916

Modification of meaning

- A843

Request for priority certificate (Electronic exchange agreement)

## Overview of Standardized Data

## Overview of Standardized Data

### Table of Content

1. Range of provided data
2. Type of provided data

## 1. Range of provided data

“The standardized data” created under the following conditions fall under the object of provision.

### (1) New data

(a) A group of items of basic information will be provided for the cases whose gazettes have been published in order.

① Patent: Publication of unexamined patent applications, published Japanese translations of PCT international publication for patent applications, domestic re-publication for patent applications, publication of examined patent applications, patent gazettes

② Utility model: Publication of unexamined utility model applications, published Japanese translations of PCT international publication for utility model applications, domestic re-publication for utility model applications, publication of examined utility model applications, publication of publication of registered utility model applications, utility model gazettes

(b) A group of items of registered information will be provided for the cases whose establishment has been registered in order.

(c) A group of items of other information will be provided for the cases which have occurred newly in the Japan Patent Office.

### (2) Renewed data

Cases which have become the target of renewal processing in the Japan Patent Office will be provided by each renewed master of the JPO.

\* A case which has become the object of provision is provided with all items to be provided on the relevant master of the JPO regardless of whether it is new or renewed. For example, if data is newly created or renewed in one item of the bibliographic Data Base for applications, all other items in the applications master will be recorded for provision.

## 2. Type of Provided Data

There are ten types of standardized data shown in the table 2.1. In principle, there is no correlation between masters\*<sup>1</sup>. The information on a newly created or a renewed case is recorded in the master of the JPO which falls under each type in a specific term of provision cycle. In addition, it is divided into “normal provision” (regular provision) and “special provision” (unlike the normal provision, data in a certain range is provided for once) by a form of provision.

\*<sup>1</sup> A case that the bibliographic Data Base for applications is able to provide becomes an object of provision in the case of cited document master file

### 2.1 Normal Provision

#### (1) Data from the 26th provision in FY2003 to the 20th provision in FY2005

The content of provided data of the cases which became the object of renewal processing or of cases which newly became the object of provision in the said range of provision in the JPO is in line with the descriptive content of the “Standardized Data Specifications XML version (Edition 1).”

(a) Data of the Item 9 and the Item 10 among types of date described in the table 2.1 are exempt from provision.

#### (2) Data from the 21th provision in FY2005 to the second provision in FY2006

The content of provided data of the cases which became the object of renewal processing or of cases which newly became the object of provision in the said range of provision in the JPO is in line with the descriptive content of the “Standardized Data Specifications XML version (Edition 1.1).”

(a) Data of the Item 9 and the Item 10 among types of date described in the table 2.1 are exempt from provision.

#### (3) Data from the 3rd provision in FY2006 to the 11th provision in FY2006

The content of provided data of the cases which became the object of renewal processing or of cases which newly became the object of provision in the said range of provision in the JPO is in line with the descriptive content of the “Standardized Data Specifications XML version (Edition 2).”

#### (4) Data from the 12th provision in FY2006 to the first provision in FY2009

The content of provided data of the cases which became the object of renewal processing or of cases which newly became the object of provision in the said range of

provision in the JPO is in line with the descriptive content of the “Standardized Data Specifications XML version (Edition 2.1).”

(5) Data after the second provision in FY2009

The content of provided data of the cases which became the object of renewal processing or of cases which newly became the object of provision in the said range of provision in the JPO is in line with the descriptive content of the “Standardized Data Specifications XML version (Edition 2.2) (this specifications).”

## 2.2 Special provision

(1) Special provision of the past data

Data of the cases whose application year is after 1983 will be provided among the cases that the JPO owned as of August 29, 2004 (equivalent to the range up to the 12th normal provision in FY2003). The content of provided data is in line with the descriptive content of the “Standardized Data Specifications XML version (Edition 1).”

The provided masters are as follows:

- (a) Bibliographic Data Base for applications;
- (b) Bibliographic Data Base for registrations;
- (c) Search master files; and
- (d) Cited document master file files

(2) Special provision of master data of the IPC 8th edition

The data of the search IPO and the link IPC are changed to the IPC 8th edition format among the search master files the JPO owned as of the end of December 2005 and they will be provided as the IPC 8th edition master (information segment of international patent classification (IPC)). The content of provided data is in line with the “Standardized Data Specifications XML version (Edition 2).”

The provided masters are as follows:

- (a) IPC 8th edition masters

Table 2.1 List of types of provided data

Number of item	Type of provided data		Content of provided data	Remark
1	Bibliographic	Patent	Information on “the	*2
2	Data Base for	Utility		

	applications	model	bibliographic Data Base for applications” of the JPO which record items of basic information classification (e.g. bibliographic and follow-up information from the acceptance of application to the final action)	
3	Bibliographic Data Base for registration	Patent	Information on “the bibliographic Data Base for registrations” of the JPO which record items of registered information classification (e.g. bibliographic information concerning the patent rights, transfer, extinction and change thereof and rights)	*2
4		Utility model		
5	Search master file	Patent	Information on “the search master files” of	*2
6		Utility model

Data after the 21st provision in FY2014: once/ a week

## Chapter 1 Data Specifications

## Chapter 1 Table of Content

1. Method of provision
    - 1.1 Media specifications
    - 1.2 Provision configuration
    - 1.3 Storage format
    - 1.4 Storage
    - 1.5 Provision cycle
  2. File specifications
    - 2.1 XML data
      - 2.1.1 Catalogue file
      - 2.1.2 DTD file
      - 2.1.3 Provided data file
      - 2.1.4 Deleted data file
  3. Character code
- Appendix “DTD List”

## 1. Method of provision

“The standardized data” is provided in accordance with the following guidelines with DVD-R as medium.

### 1.1 Media specifications

#### (1) Physical format

The physical format is in accordance with “DVD-R for General ver.2.0,” the specification for recordable DVD, permitted by the DVD forum held in May 2000.

#### (2) Logical format

The logical format is in accordance with “TR X 0006-1998 DVD-Volume and file structure of play-only disk.” Moreover, the bridge format (JIS X 0609 and JIS X 0606(ISO9660)) is premised.

### 1.2 Provision configuration

Each information classification of “bibliographic Data Base for applications,” “bibliographic Data Base for registration,” “search master file,” and “cited document master file” is provided in the XML<sup>\*1</sup> data format in the standardized data in patents and utility models.

<sup>\*1</sup> XML (Extensible Markup Language)

### 1.3 Storage format

There are a total of 8 types of provision unit by master unit for patents and utility models, and there are “DTD file,” “catalogue file,” “provided data file,” and “deleted data file.”

### 1.4 Storage format

A creation unit of the DVD format is by four laws (patent / utility model). A directory of an object master unit is created under the four law directory. Refer to “DVD Storage Format Image Figure” and “Overlapping of media at the time of DVD storage” for image of storage format.

① [Four laws directory] is created under [Route directory]. “DTD file” is stored in [Four laws directory].

② [Object master directory] is created under [Four laws directory].

③ [Content directory (cases to be provided)] and [Content directory (cases to be deleted)] are created under [Object master directory]

- “Catalogue files (all cases)” are stored in [Content directory (cases to be provided)]
  - “Catalogue files (all cases)” are stored in [Content directory (cases to be deleted)]
- ④ [Provided data directory] is created under [Content directory (cases to be provided)]
- “Catalogue file” and “Provided data file” which contain one file with the maximum 1,000 cases are stored in [Provided data directory].
  - Information on 1,000 cases which fall under “Provided data file” extracted from “Catalogue file (all cases)” is stored in the “catalogue file.”
- ⑤ [Deleted data directory] is created under [Content directory (all cases)]
- “Catalogue file” and “Provided data file” which contain one file with the maximum 1,000 cases are stored in [Deleted data directory].
- ⑥ [Object master directory] created by four laws is fixed
- For example, even if “the search master file” is not provided in a certain provision lot for patents, only [object master directory] of “the search master file” is created

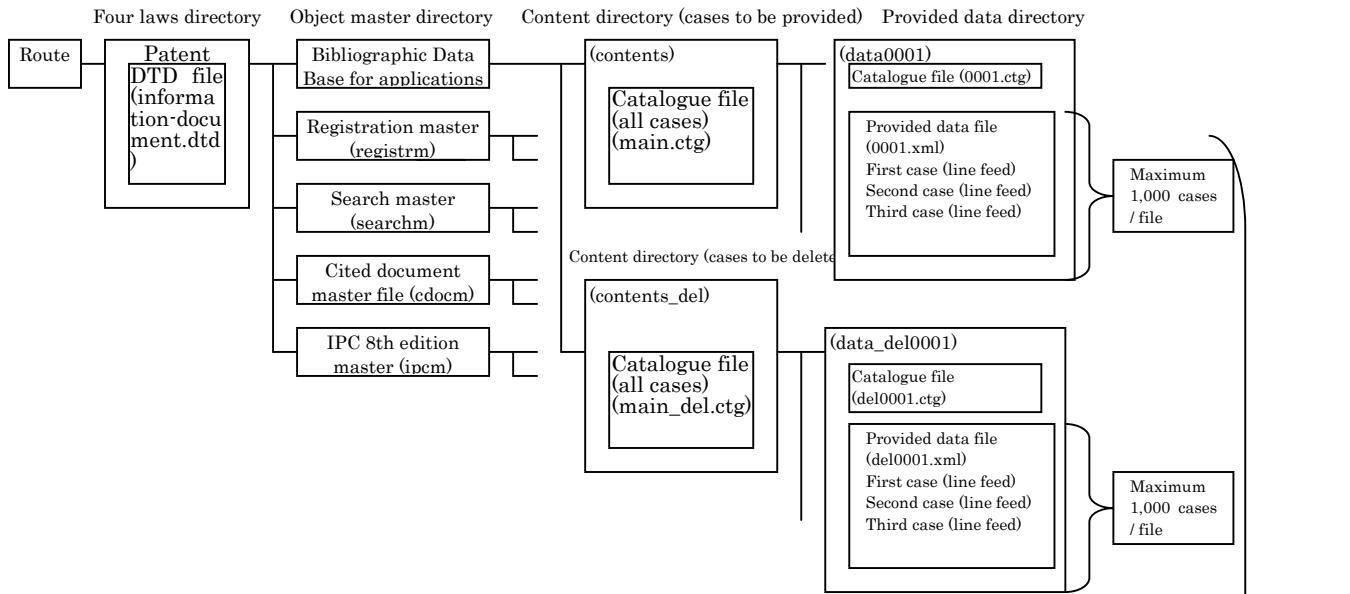

### 1.5 Provision cycle

DVD-R to the 20th provision in FY2014 should be provided in principle fortnightly.

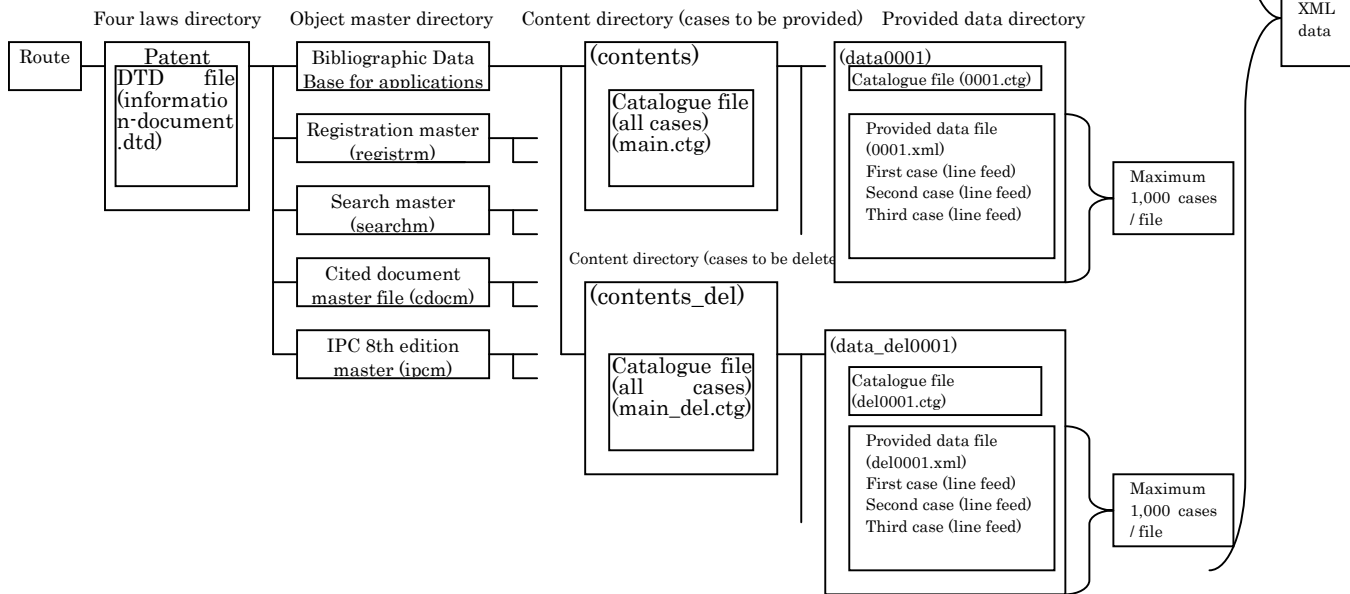

DVD-R after the 21st provision in FY2014 should be provided in principle every week.

Figure of DVD Storage Format Image

(1) Patent

(2) Utility model

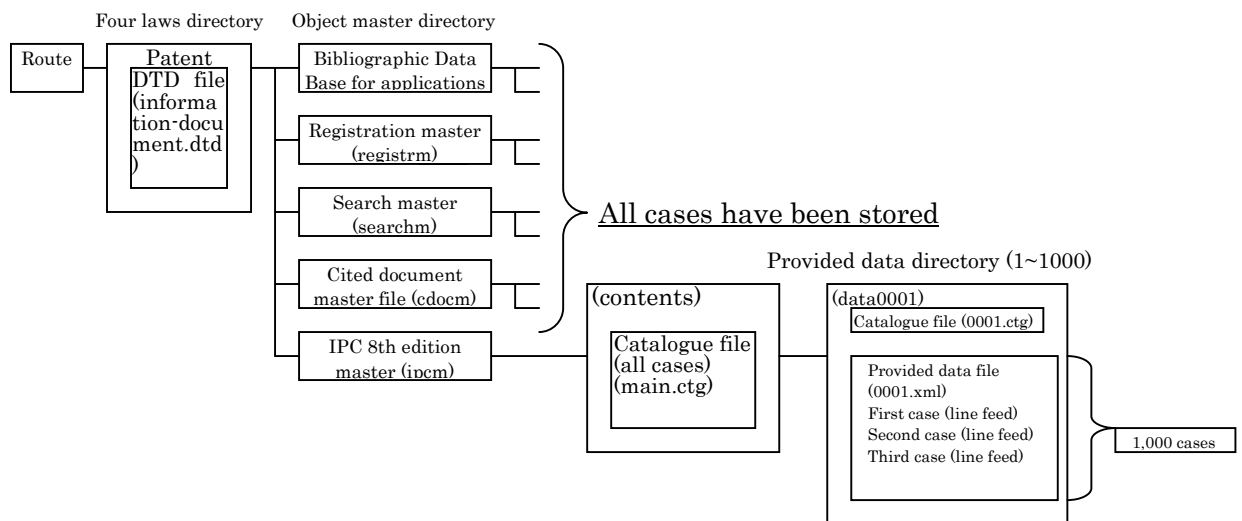

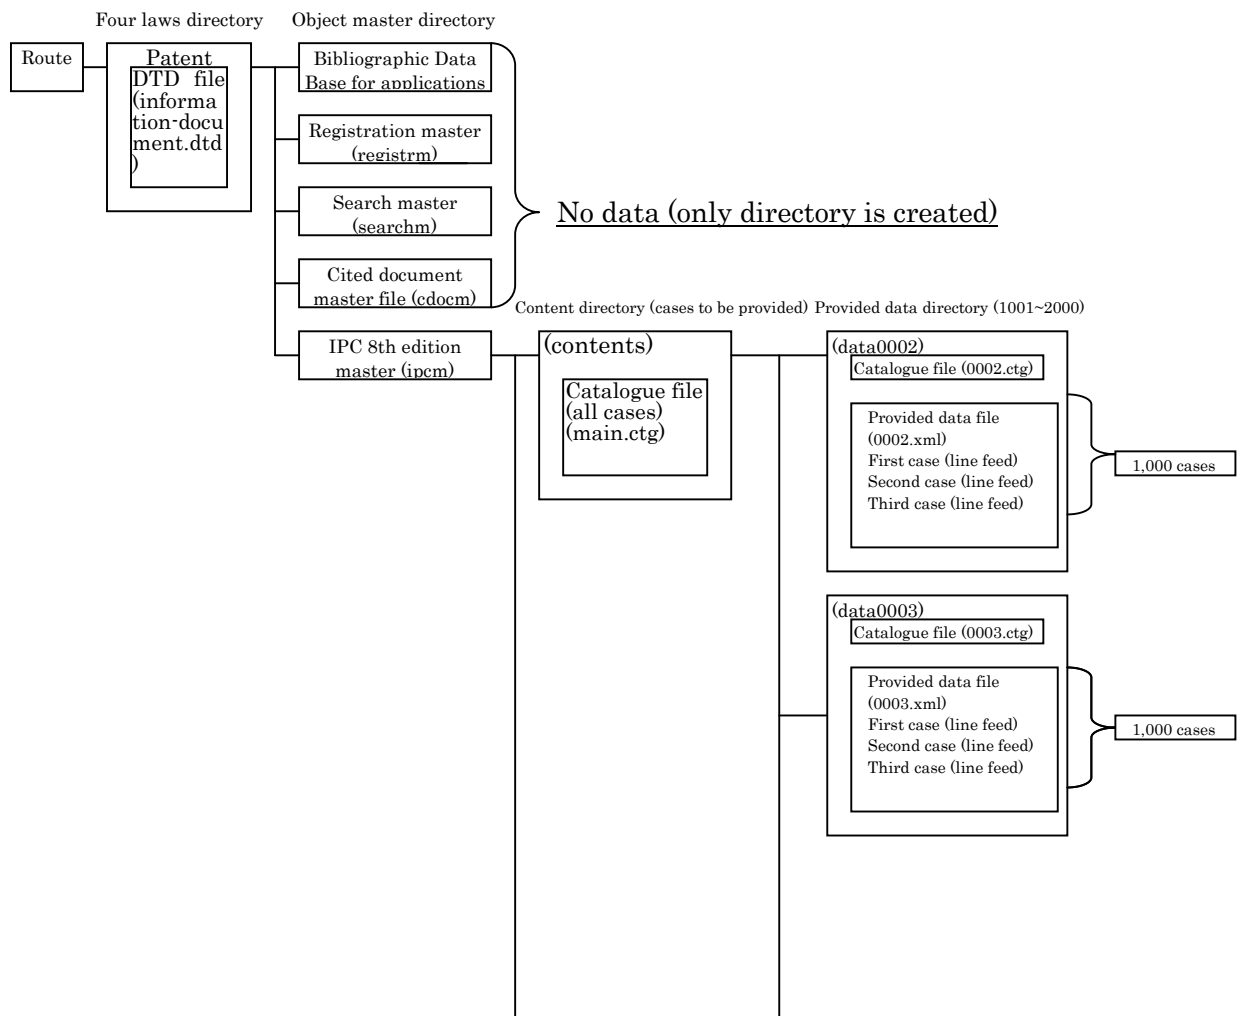

## Overlapping of media at the time of DVD storage

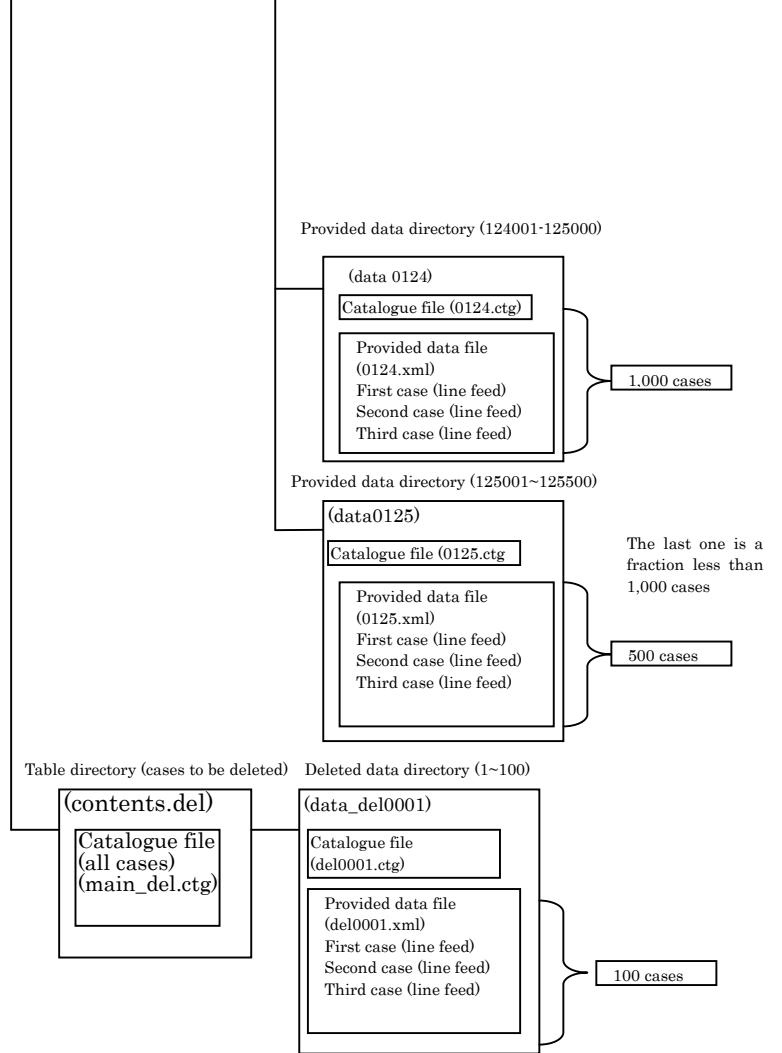

(Example) In a case of patents where there are 125,500 cases of provided data for the IPC 8th edition master and 100 cases of deleted data so that it reaches the limit up to 1,500 cases in the provided data.

### First medium

### Second medium

- (1) Only blank directory is created in the second page for an object master which has already been stored in the first page.
- (2) The provided data should be created by 1,000 cases.
- (3) The same DTD file and catalogue file (all cases) should be created both on the first and second pages.
- (4) As the deleted data are created ultimately after the all provided data have been stored, they are created only for the second page in the example above

## 2. File specifications

### 2.1 XML data

#### 2.1.1 Catalogue file

In the “catalogue file,” the number information of all cases in “the provided data file” which is in connection with the relevant file is recorded. The number information to be recorded should be key information which allows a case to be uniquely identified.

##### (1) File format

Text file format is adopted in which control characters (CR/LF) are record delimiter. The length of record is fixed by master.

##### (2) Content of record

The content of record by master is described below.

\* “△” in the table below indicates space of one character (space)

#### A. Bibliographic Data Base for applications (fixed length: 26 byte)

Item number	Item name	Attribute	Area length	Remark
1	Record length	C	3	“026”
2	Country code	C	2	“JP”: Japan
3	Four laws code	C	1	“P” Patent, “U”: Utility model
4	Application number			
	Year	C	4	Western calendar year (4 digits)
	Number	C	6	6 digits with 0 in front
5	Date of data creation	C	8	YYYYMMDD
6	Record delimiter	C	2	CR LF

#### B. Bibliographic Data Base for registration (fixed length: 64 byte)

Item number	Item name	Attribute	Area length	Remark
1	Record length	C	3	“064”
2	Country code	C	2	“JP”: Japan
3	Four laws code	C	1	“P” Patent, “U”: Utility model
4	Application number			
	Year	C	4	Western calendar year (4 digits)
	Number	C	6	6 digits with 0 in front
5	Registration number	C	7	7 digits with 0 in front
6	Divisional number	C	31	Initial value (space)
7	Date of data creation	C	8	YYYYMMDD

8	Record delimiter	C	2	CR LF
---	------------------	---	---	-------

C. Search master file (fixed length: 37 byte)

Item number	Item name	Attribute	Area length	Remark	
1	Record length	C	3	“037”	
2	Country code	C	2	“JP”: Japan	
3	Four laws code	C	1	“P” Patent, “U”: Utility model	
4	Application number			*1	
	Year	C	4	Western calendar year (4 digits)	
	Number	C	6	6 digits with 0 in front	
5	Document information	C			
	Kind	C	1	“A”: Patent (publication of unexamined patent applications, published Japanese translations of PCT international publication for patent applications, domestic re-publication of PCT international applications) “B”: Patent (published and registered patents) “U”: (publication of unexamined utility model applications, published Japanese translations of PCT international publication for utility model applications, domestic republication of PCT international utility model applications, registered utility model applications) “Y”: Utility model (published and registered utility models) “C”: Patent (claims) “Z”: Utility model (claims)	
	Year	C	4	Western calendar year (4 digits)	In case of registration

	Number	C	6	6 digits with 0 in front*2	number, “000” + registration number (7 digits)
6	Date of data creation	C	8	YYYYMMDD	
7	Record delimiter	C	2	CR LF	

\*1 Number unique to the search information when kind of the Item 5 is “C” or “Z”

Recorded in the following format

Item number	Item name	Attribute	Area length	Remark
4	Application number			(Number unique to the search information)
	Document type	C	1	“C”: Patent (claims), “Z”: Utility model (claims)
	Number part	C	9	9 digit number

2\* Recorded in the following format in a case of “republication number”

First one digit: “8”

Other five digits: 5 digits of number part of international publication number (with 0 first).

However, the first one digit of 5 digits may be recorded in Roman characters. In that case, roman characters indicate “A: 10” ~ “Z: 35.”

[Specific examples] 8A0001 → 8I00001

8F0001 → 8J00001

#### D. Cited document master file (fixed length: 26 byte)

Item number	Item name	Attribute	Area length	Remark
1	Record length	C	3	“026”
2	Country code	C	2	“JP”: Japan
3	Four laws code	C	1	“P” Patent, “U”: Utility model
4	Application number			
	Year	C	4	Western calendar year (4 digits)
	Number	C	6	6 digits with 0 in front
5	Date of data creation	C	8	YYYYMMDD
6	Record delimiter	C	2	CR LF

E. IPC 8th edition master (fixed length: 40 byte)

Item number	Item name	Attribute	Area length	Remark
1	Record length	C	3	“040”
2	Country code	C	2	“JP”: Japan
3	Four laws code	C	1	“P” Patent, “U”: Utility model
4	Application number			*1
	Year	C	4	Western calendar year (4 digits)
	Number	C	6	6 digits with 0 in front
5	Document information	C		
	Type	C	2	<p>“A<sub>Δ</sub>”: Patent (publication of unexamined patent applications, published Japanese translations of PCT international publication for patent applications)</p> <p>“B1”: Patent (registered patents)</p> <p>“B2”: Patent (published and registered patents)</p> <p>“U<sub>Δ</sub>”: (publication of unexamined utility model applications, published Japanese translations of PCT international publication for utility model applications, registered utility model applications)</p> <p>“Y1”: Utility model (registered utility models)</p> <p>“Y2”: Utility model (published and registered utility models)</p> <p>“A1” Patent (republication), utility model (republication)</p> <p>“C<sub>Δ</sub>”: Patent (claims)</p> <p>“Z<sub>Δ</sub>”: Utility model (claims)</p>
	Document number		12	

6	Date of data creation	C	8	YYYYMMDD
7	Record delimiter	C	2	CR LF

\*1 When type of the Item 5 is “C<sub>△</sub>” or “Z<sub>△</sub>”, the number is unique to the search information of International Patent Classification (IPC).

Recorded in the following format

Item number	Item name	Attribute	Area length	Remark
4	Application number			(Number unique to the international patent classification (IPC))
	Document type	C	1	“C”: Patent (claims), “Z”: Utility model (claims)
	Number part	C	9	9 digit number

\*2 Different according to type in the same item number

Recorded in the following format according to the type

Item number	Item name	Attribute	Area length	Remark
In a case of “A <sub>△</sub> ” “B2” (published) “U <sub>△</sub> ” (unexamined patent applications and published Japanese translations for patent applications) “Y2” (published)				
	Document number			
	Year	C	4	Western calendar year (4 digits)
	Number	C	6	6 digits with 0 in front
	Space	C	2	“△△”
In a case of “B1” “B2” (Registered) “U <sub>△</sub> ” (registered utility model) “Y1” “Y2” (registered)				
	Document number			
	Zero in front	C	3	“000”
	Number	C	7	7-digit registration number
	Space	C	2	“△△”
In a case of “A1”				
	Document number			
	Country code	C	2	“WO”
	Year	C	4	Western calendar year (4 digits)

	Number	C	6	6 digits with 0 in front
In a case of “C <sub>△</sub> ” and “Z <sub>△</sub> ”				
	Document number			
	Number	C	10	10 digits with 0 in front
	Space	C	2	“△△”

### 2.1.2 DTD file

DTD of XML is recorded in the “DTD file.”

#### (1) File Format

File format should be text file format.

A record should be a variable length.

#### (2) Content of record

Refer to “Appendix DTD List” for the content of record.

### 2.1.3 Provided data file

XML of one case should be recorded as one record in a “provided data file.”

#### (1) File format

Records by one case identified by the key information of catalogue files are stored up to 1,000 cases in one provided data file.

Control characters (CR / LF) are inserted as record delimiters between cases and stored as separated records. Record division does not occur for one case.

A record should be a variable length.

#### (2) Record structure

One record consists of one information classification, and articles and items defined in the information classification. Such structure is described below.

### Basic structure concept of one record

#### (a) Information classification

The information classification is divided into the following five types.

##### ① Basic information

Mainly, generic concept of articles of bibliographic items concerning an application

##### ② Registration information

Generic concept of articles related to registration information concerning the relevant application

##### ③ Search information

Generic concept of articles related to information for search concerning the relevant application

##### ④ National application cited document information

Generic concept of articles related to information of national cited documents concerning the relevant application

##### ⑤ International Patent Classification (IPC) information

Generic concept of articles related to information of international patent classification concerning the relevant application

#### (b) Articles

Mainly, generic concept of items which may occur in an identical even or a continuous even corresponding to each information classification: A situation by case may change the existence of a situation of existence.

#### (c) Item

A group of items to be provided for standardized data. A situation by case may change the existence of a situation of existence same as articles. Major items are in accordance with the ST.36. DVD-ROM publication specifications and the JPO's XML exchange specifications by article.

Refer to "Chapter II 3. List of Data Items" for the said information classification, articles and items

#### 2.1.4 Deleted data file

XML of one case is recorded as one record in a "deleted data file" same as in a "provided data file." Its content is limited to articles, items and renewed data

corresponding to number information defined in catalogue file in each master.

Refer to “Chapter II 4. List of Data Items to be Deleted” for the said information classification, articles and items.

### 3. Character code

#### (1) 1 byte code

Used a graphic character set for Roman characters in “JIS X 0201-1976 Coded character set for information exchange of 7 bit and 8 bit” (JIS X 0201-1976 Table 2) which is directed to the G0 set and called to row 2 to row 7.

#### (2) 2 byte code

Used a graphic character set for Roman characters in “JIS X 0208-1997 Coded kanji character set for 2-byte information exchange of 7 bit and 8 bit” (The eight bit of each byte of graphic character code in JIS X 0208-1990 Table 2) which is directed to the G1 set and called to row 10 to row 15.

As for specific characters (JPO external characters) to which font has been independently assigned in the JPO from the past, values converted to the relevant character string based on the standard described in the standardized data specifications will be provided data. A relevant character string (refer to “list of provided format of specific characters”) exists in each information classification.

#### (3) Control character code

Carriage return (CR) Line feed (LF) are used.

Name	Code	Coded representation
Carriage return	CR	(0D) <sub>16</sub>
Line feed	LF	(0A) <sub>16</sub>

#### (4) Replacement of characters

The following character strings are replaced with characters for use at the time of display or printing so that open delimiter (and “close delimiter”), not tag, can be used as data. If the following character strings appear in data, they are replaced with replacement characters at the time of display or printing. All of replacement characters are 1 byte code.

Character string	Replacement character
&gt;	>
&lt;	<
&amp;	&
&apos;	'
&quot;	”

List of provision format of specific characters (1/10)

Specific character	Provision format (character)	Provision format (code)	Specific character	Provision format (character)	Provision format (code)

### List of provision format of specific characters (10/10)

[illegible]

## Appendix “DTD List”

Contents of the DTD List are described in the following pages.

## Chapter II List of Data Items

## Chapter II Table of Content

1. Explanation of list of items
2. Precautions concerning items
3. List of data items
4. List of deleted data items

## 1. Explanation of list of items

Item number	Level	Repeat	Compulsory	Blank tag	Tag name	Standard item title	Compulsory	Attribute name	Attribute title
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)

Attribute	Number of digits	Code INDEX	Content of item	Patent	Utility model
(11)	(12)	(13)	(14)	(15)	

### (1) Item number

A sequence of numbers given to each standard item

### (2) Level

Display of level of each standard item

0: Route

1: Information classification

2: Article or item

3~: Item

### (3) Repeat

Display of the existence of repeat of each standard item.

○: There are repeats at the relevant level

No mark: No repeats

### (4) Compulsory

A standard item with ○ indicates that it essentially exists when an article to which the item belongs is provided. However, if there does not exist a value to be input in the relevant standard item, the value in the standard item is set as 'N/A' regardless of the values in (11) Attribute and (12) Number of digits (excluding when a blank tag is designated).

### (5) Blank tag

A standard item with ○ indicates that a tag is set as a blank tag when an article to which the item belongs is provided if there does not exist a value to be input in the relevant standard item. Even if (4) Compulsory is designated in the relevant standard

item, blank tag is set without setting the value of C' N/A'.

(6) Tag name

A character string in the tag given to each standard item

(7) Standard item title

A title of each standard item: It is combined with the tag name (in Japanese) used in the DVD-ROM publication specifications. However, when the standard item title is different from the tag name (in Japanese) used in the DVD-ROM publication specifications, both of them are described in brackets.

(8) Compulsory

A standard item with ○ indicates that it essentially exists when an article to which the item belongs is provided. However, if there does not exist a value to be input in the relevant standard item, the value in the standard item is set as C' N/A' regardless of the values in (11) Attribute and (12) Number of digits (excluding when a blank tag is designated).

(9) Attribute name

Name of attribute attached to the standard item

(10) Attribute title

Title of each attribute

(11) Attribute

Attribute of each standard item

C: 1 byte code (alphanumeric character or code)

N: 1 byte code (right-aligned number without 0 in front)

K: 2 byte code (kanji)

X: Change depending on the content of values (No designation of attribute)

→: Change depending on the description of (14) Content of item

(12) Number of digits

Number of digits of each standard item

Numerical value: It means the maximum existential number of digits.

n: Undefined length of 1 byte code

m: Undefined length of 2 byte code

→: Change depending on the description of (14) Content of item

(13) Code INDEX

INDEX of a code table corresponding to Chapter III if there is one.

(14) Content of item

Situation, format, conditions, etc. of standard item

N: 1-digit number

C: 1-digit number or 1-digit Roman character or 1-digit code

yy: Last 2 digits of western calendar year

YYYYMMDD: Type of date    YYYY: Western calendar year

MM: Month (01~12)

DD: Day (01~31)

YYYYNNNNNN: Type of number    YYYY: Western calendar year

NNNNNN: Number (000001~999999)

(Indicate the fixed value 0)

“Value”: Fixed value

(15) Object four laws

A mark “●” is given to each standard item corresponding to “Table 2.1: List of types of provided data.”

Patent: In a case of Patent

Utility model: In a case of Utility model

## 2. Precautions concerning items

(1) Tags of each information classification appear in order described in the “list of data items.”

(2) Tag names are, in principle, in accordance with the following three specifications.

- WIPO Standards (ST.36)
- DVD-ROM Publication Specifications
- JPO XML Exchange Specifications

※ However, there are unique items which do not conform to any of the three specifications above.

① As for a tag specified as [compulsory] in any one of the three specifications above, it is provided with the relevant tag even if there is no content of item by setting the content of item as C' N/A' (Not available).

② Tags which are not specified as [compulsory] are regarded as [optional] tags, and if there is not content of item, the relevant tag is not provided.

(a) Articles and items out of distinction of the Law of the relevant case

[Example] There is no additional patent number article for utility model applications.

(b) Articles and items out of the applicable Law of the relevant case

[Example] There is no publication of articles for patent applications of post-grant opposition.

(c) Non-accumulated item by examination progress of the relevant case

[Example] There is no examination final action information in detailed item articles of applications for patent applications under examination.

## Chapter III Table of Code

### Chapter III      Contents

1. List of tables of code
2. Table of code

1. List of code tables

List of code tables			
Item number	Code title	Code INDEX	Remark
1	IPC 8th edition	B0390	⇒ C0050, C1490 ~ C1530
2	IPC article	B0150	⇒ C0120, C0130, C0140, C0150
3	Kind of decision on opposition (examination)	C0410	
4	Kind of citation	C1010	
5	Cited document number	B0270	⇒ B0280, B0290, B0300
6	Cited document number (foreign patent document)	B0290	⇒ C0050
7	Cited document number (national patent document)	B0280	
8	Cited document number (non-patent document)	B0300	
9	Cited document classification	C1020	
10	Prohibition of inspection	C0730	
11	Related kind	C0025	
12	Foreign language application flag	C0310	
13	Government-related identification	C0770	
14	Administrative appeal number	B0100	
15	Country and prefecture code	C0050	
16	Retrieval IPC article	B0170	⇒ C0140, C0150

17	Transfer of right / grant of working license	C0380	
18	Pollution control-related technical mark	C0390	
19	Morality	C0250	
20	International publication number	B0030	⇒ C00 50
21	International application number	B0020	⇒ C0050
22	Code which represents legal attribute of an applicant	C0070	
23	Examination kind	C0350	
24	Domestic classification symbol	C0140	
25	Designated state attribute	C0220	
26	Application kind	C0020	
27	Application kind, related kind	B0310	⇒ C002, C0025
28	Applicant / attorney code	B0070	⇒ B0190
29	Application number	B0010	
30	Action number	B0110	

#### List of code tables

Item number	Code title	Code INDEX	Remark
31	Article code	C0230	
32	Clause code (reason for refusal)	C0710	
33	Reference type	C1240	
34	Flag of completion of process in response to	C0430	

	invitation		
35	Kind of examiner / appeal examiner	C0100	
36	Kind code for final decision of examination	C0360	⇒ C0050
37	Kind of examination	C0370	
38	Applicant ID code	B0190	
39	Kind of trust	C1480	
40	Existence of trust registration	C1570	
41	Distinction of right and wrong	C0210	
42	Accelerated examination mark	C0240	
43	Procedural code	C0400	
44	Term	C0170	
45	Corresponding code	C0870	
46	First class flag	C1500	⇒ C0140, C0150
47	Representative document number	B0260	
48	Agent qualification code	C0090	
49	Agent kind code	C0080	
50	Intermediate code	B0090	⇒ C0050
51	Intermediate code (examination)	C0840	⇒ C0050
52	Intermediate code (registration)	C0860	
53	Theme code	C0160	
54	Special affair	X0010	
55	Existence of supplement of annual fee	C0790	

56	Date flag	C1030	
57	Publication classification	C0030	⇒ C002, C0025
58	Invention information / additional information flag	C1510	⇒ B0190
59	Number kind code	C0060	
60	Edition code	C0120	

List of code tables

Item number	Code title	Code INDEX	Remark
61	Accession code of microorganism	B0330	
62	Accession number of microorganism	B0340	
63	Additional code	C1180	
64	Grant cause flag	C1520	
65	Grant method flag	C1530	
66	File discrimination symbol	C0150	⇒ C0050
67	Classification distinction	C0130	
68	Classification level flag	C1490	
69	Existence of closed register transcription	C0800	
70	Formality completion mark	C0420	
71	Right cancellation distinction	C0780	
72	Priority claim number	B0060	
73	Correction of improper abstraction by ex officio	C0260	

74	Preliminary examination mark	C0040	
75	Four laws	C0010	

## 2. Code Table

Standardized data code table	Explanation of special item	Code INDEX	X0010	VER	2.0 (1.0)
<u>Special notes concerning the list of date items are described below.</u>					
<p>*01 Final decision dispatch date</p> <p>The final action date is set on the final decision dispatch date if the final action is made.</p> <p>*04 Article of ratio of share</p> <p>The ratio of share by other than country is set in the joint ownership of a right by a country and other than country. The left 5-digits indicate a numerator and the right-5-digits indicate a denominator in 10 digits of the relevant article.</p> <p>Example: 0005000100 indicates 50/100</p> <p>*09 Number and date in the registration information</p> <p>If it is provided by the following values, the content of the JPO's electronic processing is recorded.</p> <p>0000001 or 00000001 or 0000000001: "Unknown"</p> <p>0000002 or 00000002 or 0000000002: "No record"</p> <p>0000003 or 00000003 or 0000000003: "Not applicable"</p> <p>*11 Existence of articles of registration information and provision of items according to a condition of inspection of copy of the JPO's bibliographic Data Base for registration</p>					

A condition of inspection of copy of the JPO's bibliographic Data Base for registration decides the existence of provision of articles and items in the registration information.

If inspection of a copy is “unavailable,” only the following articles and items are provided:

- Prevention of inspection of a copy
- Registration article (document information)
- Articles of the registration gazette publication date (Available date for public)
- \*Provided only if a gazette has been published
- \*Renewal date will not be provided

If inspection of a copy is “available,” the following articles and items are provided:

- Four laws ~ renewal date

\*12 Document kind “C” or “Z”

If the document kind of “representative document number” item is “C” or “Z,” there are no “four laws” and “filing document articles” in the said case.

\*13 Document kind “C” or “Z”

If the document kind of “gazette kind” item is “C” or “Z,” there are no “filing document articles” in the said case.

Standardized data code table	Explanation of special item	Code INDEX	B0070	VER	2.2 (1.0)
Item title	Applicant / agent code		Type & length	Cn (Roman character n=2 or 4 or 6 or 8 Roman character (8) + “*” n=9 Alphameric character n=3 or 4 Number n=9)	

Date format	<div>Roman character</div> <div><div>C<sub>1</sub>C<sub>2</sub> ~ C<sub>7</sub>C<sub>8</sub></div><div>C2 ~ C8</div></div> <div>Roman character (8 digit) + “*”</div> <div><div>C<sub>1</sub>C<sub>2</sub>C<sub>3</sub>C<sub>4</sub>C<sub>5</sub>C<sub>6</sub>C<sub>7</sub>C<sub>8</sub>*</div><div>C9</div></div> <div>Alphameric character</div> <div><div>C<sub>9</sub>N<sub>1</sub>N<sub>2</sub></div><div>C3</div></div> <div>or</div> <div><div>C<sub>10</sub>N<sub>3</sub>N<sub>4</sub>N<sub>5</sub></div><div>C4</div></div> <div>Number</div> <div><div>N<sub>6</sub> ~ N<sub>14</sub></div><div>C9</div></div>
Content	<div>(1) When the number of digits in roman character is 2,4,6, 8 and 8 digits + “*”, “filing country code”</div> <div>2-digit Roman character indicate “filing country code” of one country (please refer to the code table C0050)</div> <div>C<sub>1</sub>C<sub>2</sub> C<sub>3</sub>C<sub>4</sub> C<sub>5</sub>C<sub>6</sub> C<sub>7</sub>C<sub>8</sub>: 1 ~ 4 countries per one item</div> <div>“*” in the 9th digit at the end is given if there exists a fifth country and later</div>

	<p>(2) When the number of digits in alphanumeric character is 3 digits, “JPO / former applicant code”  C<sub>9</sub>: Number or “A”  N<sub>1</sub>N<sub>2</sub>: Number</p> <p>(3) When the number of digits in alphanumeric character is 4 digits, “JPO / former agent code”  C<sub>10</sub>: Number or “A” ~ “G”  N<sub>3</sub>N<sub>4</sub>N<sub>5</sub>: Number</p> <p>(4) When the number of digits in number is 9 digits  1) “Applicant ID code” for the following items (please refer to the code table B0190)  2) An effective number of digits with 0 in front deleted is “JPO / former applicant code” or “JPO / former agent code” for other than the items above</p>
Remark	Input of “filing country code” is only for patents and utility models and data has been created from 1990.

Standardized data code table	Explanation of special item	Code INDEX	B0090	VER	2.1 (1.0)
Item title	Intermediate code		Type & length	C <sub>n</sub> (n = 3~7)	

Date format	<table><tr><td>C<sub>1</sub>C<sub>2</sub>C<sub>3</sub>C<sub>4</sub>C<sub>5</sub>C<sub>6</sub>C<sub>7</sub></td></tr><tr><td>C3 ~ C7</td></tr></table>	C <sub>1</sub> C <sub>2</sub> C <sub>3</sub> C <sub>4</sub> C <sub>5</sub> C <sub>6</sub> C <sub>7</sub>	C3 ~ C7
C <sub>1</sub> C <sub>2</sub> C <sub>3</sub> C <sub>4</sub> C <sub>5</sub> C <sub>6</sub> C <sub>7</sub>			
C3 ~ C7			
Content	<p>C<sub>1</sub>: A or R</p> <p>C<sub>2</sub>C<sub>3</sub>C<sub>4</sub>C<sub>5</sub>C<sub>6</sub>C<sub>7</sub>: Left-aligned alphameric number with 2 ~ 6 digits</p> <p>When C<sub>1</sub>=A, intermediate code of examination (please refer to the code table C0840)</p> <p>When C<sub>1</sub>=R, intermediate code of registration (please refer to the code table C0860)</p> <p>However, C<sub>1</sub>=A is used for some of intermediate codes of registration</p> <p>Please refer to the next paper for intermediate code of registration</p>		
Remark			

Standardized data code table	Explanation of special item	Code INDEX	B0090	VER	2.1 (1.0)
<u>Intermediate record of registration</u>					
<p>Intermediate records of registration are divided into those of applications, setting, annual fees, transfer and others.</p> <p>(1) Record of applications</p> <p>Paper of decision to grant a patent / paper of decision to grant registration (A01)</p>					

Written measure of application dismissal (A045)

Notification of wrong transmission (A26)

Retransmission (A28)

Official gazette (A29)

(2) Records of setting and annual fees

The structure of intermediate code is as follows:

		statement, documents	miscellaneous
	Business distinction	1: Setting 2: Annual fees	
(3) Records of transfer			
R	<u>3</u> <u>x</u> <u>x</u> <u>x</u> <u>x</u> <u>x</u>		
		Document number: Number by document	
		Four laws kind or document kind	
		1: Patent	
		2: Utility model	
		5: Notification of completion of transfer	
		6: Notification of reasons for dismissal / order of evidence	
		7: Dismissal action / withdrawal	
		8: Supplement invitation	
		9: Written invitation, written explanation, order of evidence, written statements, miscellaneous documents	
		D: Notification of change of agent	
		E: Stamp refund (transfer)	

<p>———— Business distinction      3: Transfer</p> <p>(4) Other records</p> <p>Notification of wrong transmission (R90<u>x</u>)</p> <p>Notification of cancellation of ex officio (R91<u>x</u>)</p> <p>Notification of invalidity (R92<u>x</u>)</p> <p>Notification of reclamation of ex officio (R93<u>x</u>)</p>

Standardized data code table	Explanation of special item	Code INDEX	B0310	VER	1.0
Item title	Kind of application, related kind		Type & length	C4	

Date format	<table><tr><td>C<sub>1</sub>C<sub>2</sub>C<sub>3</sub>C<sub>4</sub></td></tr><tr><td>C<sub>4</sub></td></tr></table>	C <sub>1</sub> C <sub>2</sub> C <sub>3</sub> C <sub>4</sub>	C <sub>4</sub>
C <sub>1</sub> C <sub>2</sub> C <sub>3</sub> C <sub>4</sub>			
C <sub>4</sub>			
Content	<p>C<sub>1</sub>C<sub>2</sub>C<sub>3</sub>C<sub>4</sub>: 4 digits</p> <p>Each factor C<sub>n</sub> is in hexadecimal and has value of 0 ~ 9 and A ~ F. Therefore, kind of application or related kind (hereinafter referred to as kind) is in the range of 0000 ~ FFFF.</p> <p>Kind has more than one meaning. (Kind of application: please refer to the code table C0020)</p> <p>(Related kind: please refer to the code table C0025)</p> <p>Please refer to the next paper for the method to view the meanings of kind</p>		
Remark			

Standardized data code table	Explanation of special item	Code INDEX	B0310	VER	1.0
<u>Method to view the meanings of kind</u>					

## 1. Separation between each factor

Each factor of a kind is separated according to the following method.

One kind is separated to several kinds based on the rule above and it has several meanings.

## 2. Breakdown in one factor

$C_n$  of each kind separated in 1. is broken down according to the following rule.

$0 \rightarrow 0$	$8 \rightarrow 8$
$1 \rightarrow 1$	$9 \rightarrow 1, 8$
$2 \rightarrow 2$	$A \rightarrow 2, 8$
$3 \rightarrow 1, 2$	$B \rightarrow 1, 2, 8$
$4 \rightarrow 4$	$C \rightarrow 4, 8$
$5 \rightarrow 1, 2$	$D \rightarrow 1, 4, 8$
$6 \rightarrow 2, 4$	$E \rightarrow 2, 4, 8$
$7 \rightarrow 1, 2, 4$	$F \rightarrow 1, 2, 4, 8$

One factor is broken down to several factors based on the rule above and it has several meanings.

3. Corresponding meanings as code symbols to each kind and each factor separated and broken down in 1. and 2. are searched from the code tables.

[Specific cases]

A case of application kind of utility model (0000)

“0000” is handled as “0000” based on 1.

“0000” has one meaning of “0000” based on 2.

“0000” is “normal” based on 3. (code table C0020).

\*Kind of application (0000) signifies “normal.”

A case of application kind of patent (000A)

“000A” becomes “000A” based on 1.

“000A” has two meanings of “0002” and “0008” based on 2.

“0002” is “consolidation” based on 3. (code table C0020).

“0008” is “change” based on 3. (code table C0020).

\*Kind of application (000A) signifies “consolidation and change.”

A case of application kind of patent (0012)

“0012” is separated into “0002” and “0010” based on 1.

“0002” has one meanings of “0002” based on 2.

“0010” has one meanings of “0010” based on 2.

“0002” is “consolidation” based on 3. (code table C0020).

“0008” is “dismissal of amendment” based on 3. (code table C0020).

\*Kind of application (000A) signifies “consolidation and dismissal of amendment.”

When there is violation against public order and morality (another value in this paper is “1”), the provided data is in the following condition.

Patent / Utility model

Basic information: If there is a string which violates public order and morality in “an article of title of the invention,” the said string is provided in a turned letter (× or XX etc.) or provided with a phrase indicating “not published” or “an article of title of the invention” itself will not be provided.

Standardized data code table	Explanation of content of code	Code INDEX	C0840	VER	2.2 (1.0)
Title of item	Intermediate code (examination)		Type & length	C <sub>n</sub> (n=3~7)	
Explanation					
Identification of application related documents					
Please refer to the next paper.					

Type: 1- Examination/acceptance type (→JPO), 2- Examination/transmittal type (The JPO→), 3- Examination/internal type (internal), 4- Examination/internal type (return to the JPO) P: Patent, UM: Utility model						
Item number	Code symbol	Meaning	Type	P	UM	Remark
1	A0071	Interruption	3	●	●	
2	A0072	Removal of interruption	3	●	●	
3	A01	Decision to grant a patent	2	●		
		Decision to grant a registration			●	
4	A02	Decision of refusal	2	●	●	
5	A031	Invalidation of application (application)	2	●	●	
6	A032	Written measure of invalidation of application (registration)	2	●	●	
7	A033	Invalidation of application (request for examination)	2	●	●	
8	A042	Written measure of dismissal of application (reasons for dismissal)	2	●	●	
9	A043	Written measure of dismissal of application (invitation to correct)	2	●	●	
10	A044	Written measure of dismissal of application (identification)	2	●	●	
11	A045	Written measure of dismissal of	2	●	●	

		application (registration)				
12	A046	Written measure of dismissal of application (request for examination)	2	●	●	
13	A06	Invalidation of opposition	2	●	●	
14	A071	Notification (resubmission notification)	2	●	●	
15	A072	Dismissal of procedure (reasons for dismissal)	2	●	●	
16	A073	Dismissal of procedure (invitation to correct)	2	●	●	
17	A074	Dismissal of procedure (identification)	2	●	●	
18	A075	Written measure of dismissal of procedure (request for certificate)	2	●	●	
19	A08	Written measure	2	●	●	
20	A091	Invalidation of procedure (application)	2	●	●	
21	A092	Invalidation of procedure (opposition)	2	●	●	
22	A093	Notification (Section 30 lapse)	2	●	●	
23	A094	Notification (Paris priority lapse)	2	●	●	
24	A101	Written notification of reasons for dismissal (request)	2	●	●	
25	A102	Written notification of reasons for dismissal (intermediate document)	2	●	●	
26	A103	Written notification (pre-dismissal notification)	2	●	●	

27	A111	Written directive of amendment (application)	2	●	●	
28	A112	Written directive of amendment (intermediate document)	2	●	●	
29	A113	Written directive of amendment (formality) (request)	2	●	●	
30	A114	Written directive of amendment(formality) (request)	2	●	●	
31	A115	IB written inquiry	2	●	●	
32	A121	Written order of submission of evidence (formality)	2	●	●	
33	A131	Notification of reasons for refusal	2	●	●	
34	A132	Notification of reasons for refusal (precedent application)	2	●	●	
35	A133	Notification of reasons for refusal (interview)	2	●	●	
36	A14	Resumption order	2	●	●	
37	A141	Written directive of succession of the procedure	2	●	●	
38	A15	Decision on publication of examined application	2	●	●	
39	A16	Decision on opposition	2	●	●	
40	A17	Decision on reply	2	●	●	

41	A18	Invitation for refutation	2	●	●	
42	A191	Decision to dismiss the amendment	2	●	●	
43	A192	Decision to dismiss the amendment	2	●	●	
44	A201	Transmittal of duplicate (to applicant)	2	●	●	

Type: 1- Examination/acceptance type (→JPO), 2- Examination/transmittal type (The JPO→), 3- Examination/internal type (internal), 4- Examination/internal type (return to the JPO) P: Patent, UM: Utility model

Item number	Code symbol	Meaning	Type	P	UM	Remark
45	A205	Transmittal of duplicate (to applicant)	2	●	●	
46	A211	Invitation to correct opposition (written opposition)	2	●	●	
47	A212	Invitation to correct opposition (written supplement of reasons)	2	●	●	
48	A23	Notification of application number	2	●	●	
49	A231	Specified written notification of application number	2	●	●	
50	A232	Notification of application number	2	●	●	PCT related documents
51	A241	Written notification (other	2	●	●	

		notification) (with term)				
52	A241000	Notification of appointment of patent administrator	2	●	●	
53	A241764	Notification of invalidation of claim of internal priority (with term)	2	●	●	
54	A24182	Notification of restoration of sample	2	●	●	
55	A242	Written notification (other notification) (with term)	2	●	●	
56	A242000	Notification of copy of family register	2	●	●	Including certificate of residence
57	A24214	Written notification of continuation of the procedure	2	●	●	
58	A24215	notification gazette in the name of the Commissioner (without term): Notification because of improper print	2	●	●	
59	A24219	Notification in the name of the Commissioner (without term): Notification because of a new application of declining of amendment	2	●	●	

60	A2426	Notification in the name of the Commissioner (without term): Notification because of converted application	2	●	●	
61	A242623	Notification of utility model registrability	2		●	
62	A242624	Written notification (request for evaluation by other person)	2		●	
63	A242625	Written notification (request by other person)	2	●	●	
64	A242671	Notification in the name of the Commissioner (without term): Notification of withdrawal of opposition	2	●	●	
65	A242672	Notification in the name of the Commissioner (without term): Notification of partial abandonment of opposition of	2	●	●	
66	A242711	Notification in the name of the Commissioner (without term): Notification of change of applicant (specified succession)	2	●	●	
67	A242712	Notification in the name of the	2	●	●	

		Commissioner (without term): Notification of change of applicant (general succession)				
68	A242761	Notification in the name of the Commissioner (without term): Notification of withdrawal of application	2	●	●	
69	A242762	Notification in the name of the Commissioner (without term): Notification of abandonment of application	2	●	●	
70	A242764	Notification of invalidation of claim of internal priority (without term)	2	●	●	
71	A242831	Written notification by submission of publication, etc.	2	●	●	
72	A242881	Notification in the name of the Commissioner (without term): Notification of refund of fees	2	●	●	
73	A242883	Written notification (return of certificate)	3	●	●	
74	A24289	Notification in the name of the Commissioner (without term): Notification of transmittal to	2	●	●	

		workplace				
75	A242902	Written answer to inquiry	2	●	●	
76	A243624	Notification of no creation of report	2	●	●	
77	A244001	Written notification of access code	2	●	●	
78	A251	Notification in the name of the examiner (other notification) (with term)	2	●	●	
79	A25110	Notification under Section 194 (written explanation concerning divisional application)	2	●	●	
80	A25111	Notification under Section 194 (others)	2	●	●	
81	A2514	Written order for submission of written request for demonstration in presence of examiner	2	●	●	
82	A2515	Written notification of co-pending application filed on the same date by the same applicant	2	●	●	Related to Section 39-8
83	A2516	Written notification of co-pending application filed on the same date by different applicants	2	●	●	Related to Section 39-8
84	A252	Notification in the name of the examiner (other notification)	2	●	●	

		(without term)				
85	A2522	Written notification of impossibility to examine because of no request for precedent application	2	●	●	Related to Section 39-7
86	A2524	Notification in the name of the examiner (without term): Notification under Section 61, Paragraph 2 of the Patent Act	2	●	●	
87	A2529	Notification of non-disclosure of information on prior art documents	2	●		
88	A26	Notification of wrong transmittal	2	●	●	
89	A271	Notification of correction by ex officio	2	●	●	

Type: 1- Examination/acceptance type (→JPO), 2- Examination/transmittal type (The JPO→), 3- Examination/internal type (internal), 4- Examination/internal type (return to the JPO) P: Patent, UM: Utility model

Item number	Code symbol	Meaning	Type	P	UM	Remark
90	A272	Notification of refund of revenue stamp	2	●	●	
91	A273	Written notification of correction by ex officio (correction by ex officio)	2	●	●	

92	A274	Written notification of correction by ex officio (modification of documents)	2	●	●	
93	A275	Written notification of authorized information	2	●	●	
94	A28	Re-transmittal	2	●	●	
95	A29	Publication of official gazette	2	●	●	
96	A300	Creation of a selected list of file wrappers of un examined request	3	●	●	
97	A311	Returning of invalidation of application	4	●	●	against A111
98	A312	Suspension of returning	3	●	●	
99	A313	Final decision of rejection without a dissenting response from the applicant	4	●	●	Against A131 and A132
100	A315	Returning of publication	4	●	●	Against A15
101	A317	Returning of reply	4	●	●	Against A17
102	A318	Returning of refutation	4	●	●	Against A18
103	A319	Returning of declining of amendment	4	●	●	Against A191 and A192

104	A322	Returning of invitation to correct	4	●	●	Against A221 and A222
105	A325	Returning of miscellaneous instruction	4	●	●	Against A251XXX
106	A330	Returning of invalidation of registration	4	●	●	
107	A364	Returning of opposition	4	●	●	
108	A50	Written correction of errors in the description	1	●	●	
109	A51	Written amendment (formality)	1	●	●	
110	A521	Written amendment	1	●	●	
111	A5210	Written submission of translation of amendment under Section 34 of the Patent Cooperation Treaty (ex officio)	1	●	●	PCT related documents
112	A5211	Written submission of copy of amendment under Section 34 of the Patent Cooperation Treaty	1	●	●	PCT related documents
113	A5212	Written submission of copy of amendment under Section 34 of the Patent Cooperation Treaty (ex officio)	1	●	●	PCT related documents
114	A522	Written amendment	1	●	●	
115	A523	Written amendment	1	●	●	

116	A524	Written correction of mistranslation	1	●	●	
117	A525	Written submission of translation of amendment under Section 19 of the Patent Cooperation Treaty	1	●	●	PCT related documents
118	A526	Written submission of translation of amendment under Section 19 of the Patent Cooperation Treaty (ex officio)	1	●	●	PCT related documents
119	A527	Written submission of copy of amendment under Section 19 of the Patent Cooperation Treaty	1	●	●	PCT related documents
120	A528	Written submission of copy of amendment under Section 19 of the Patent Cooperation Treaty (ex officio)	1	●	●	PCT related documents
121	A529	Written submission of translation of amendment under Section 34 of the Patent Cooperation Treaty	1	●	●	PCT related documents
122	A53	Written opinion	1	●	●	
123	A531	Written opinion (abstract)	1	●	●	
124	A541	Written amendment under Section 19 of PCT	1	●	●	
125	A542	Written amendment under Section 34 of PCT	1	●	●	
126	A55	Request of resumption	1	●	●	

127	A56	Written amendment of opposition	1	●	●	
128	A57	Written reply	1	●	●	
129	A58	Written refutation	1	●	●	
130	A59	Written plea	1	●	●	
131	A601	Written request for extension of term	1	●	●	
132	A602	Written permission of extension of term	2	●	●	
133	A61	Payment of annual fee	1	●	●	
134	A621	Written request for application examination	1	●	●	

Type: 1- Examination/acceptance type (→JPO), 2- Examination/transmittal type (The JPO→), 3- Examination/internal type (internal), 4- Examination/internal type (return to the JPO) P: Patent, UM: Utility model

Item number	Code symbol	Meaning	Type	P	UM	Remark
135	A623	Registrability report	1		●	
136	A624	Registrability report (other person)	1		●
