[Separate sheet] About corresponding reception document number

* For the corresponding accepted document number of a shipping document entity, if the intermediate code is the following documents, the entity stores the same system as the shipping document number because it is necessary to link it with the shipping document, and the intermediate documents listed below must be linked to the reception documents, so the corresponding reception document number is stored.

- * C2811; Corrective decision
- * C2824; Miss-delivery notification

For the other intermediate documents, the initial value NULL is set because there is no need to link the received documents and the shipping documents. However, when the intermediate code and intermediate code 2 are as follows, the initial value is '0000000000', but the business process is same as the initial value NULL.

- * Intermediate code "C236", intermediate code 2 "1" (consolidation appeal notice (case unit consolidation))
- * Intermediate code "C 237", intermediate code 2 "1" (separation of consolidated trial notification (separation of consolidated case by case unit))

As for the corresponding receipt document number of an internal office document entity, the shipping document number is entered when the intermediate code is the following documents. For other intermediate documents, an initial value space is stored.

- *C28: Resend (The initial value may be set to NULL depending on the document to be resent.
- *C3012: Postal service report

Shipping documents and intermediate codes that need to be linked with the reception documents

(If the document corresponds to one of the following intermediate codes, the document number is stored in the corresponding acceptance document number.)
