Guide for Making Applications and Drawings for Design Registration

(Provisional translation)

March 2021 Japan Patent Office

Preface

When filing an application for design registration, the applicant needs to submit an application stating necessary matters as well as drawings, etc. representing the design for which the design registration is requested, according to laws and regulations.

The Japan Patent Office (JPO) released guidelines in 1991 explaining how to make such applications and drawings, etc. and in 2008, the guidelines were consolidated into a handbook and published as the "Guide for Making Applications and Drawings for Design Registration." The JPO has since reviewed and enhanced the contents of the Guide in response to the partial revision of the Examination Guidelines for Design in 2017, and the partial revision of the Examination Guidelines for Design in 2019.

As a result of buildings and graphic images being recently added to subject to protection following revision of the Design Act in 2019, new statements corresponding to those revisions have been added and related statements have been reviewed. In addition, as a consequence of the recent revision, the JPO has published "Examples of the Article, etc. to the Design" as an appendix to this Guide to serve as a guideline for making statements in applications when filing an application.

This Guide has been designed to describe a basic outline and typical examples of how to prepare applications and drawings for design registration, but not to mandate that applications and drawings, etc. be made exactly as described in this Guide.

For details on requirements for registration, please see the "Examination Guidelines for Design," and for the prescribed forms, etc. required for the procedures, please see the "Guidelines for the Procedures of Filing an Application for Design Registration."

We hope that this Guide will be of help in preparing applications and drawings, etc. when filing an application for design registration.

March 2021 Design Examination Standards Office, Design Division, Patent and Design Examination Department (Physics, Optics, Social Infrastructure and Design), Japan Patent Office

Part I Basics of How to Represent the Design in the Application1
1. Basics of the Statement in the Application2
1.1 The column of "Article to the Design"
(1) The article to the design, the usage of the building or graphic
image to the design2
(2) Examples of statements where a design registration for a
design for a set of articles is requested
(3) Examples of statements where a design registration for an
interior design is requested4
(4) Examples of statements in the column of "Article to the
Design"
1.2 The column of "Description of Article to the Design"
(1) Where the purpose of use or state of use, etc. of the article,
building or graphic image is unclear from statements in the
column of "Article to the Design" alone
(2) In the case of an article, etc. exemplified under "Articles, etc.
to the Design" in "Examples of the Article, etc. to the Design"9
(3) Points to be noted in making a statement
1.3 The column of "Description of Design"
(1) Matters to be stated
(2) Points to be noted in making a statement
1.4 The column of the "Design Number"
2. Basics of the Depiction in Drawings14
A. Drawings necessary for specifying the shape, etc
2A.1 Types of drawing formulated in the form and basic points to
be noted15
The types of drawings necessary for specifying the shape,
etc15
(2) Points to be noted in preparing drawings
2A.2 Preparing drawings by the orthographic projection method . 18
(1) Points to be noted when preparing drawings by the
orthographic projection method18
2A.3 Preparing drawings by the isometric projection method and
the oblique projection method21
(1) Isometric projection method22
(2) Oblique projection method22
(3) Points to be noted in using the isometric projection method
and the oblique projection method23
(4) Points to be noted in the combine use of the orthographic
projection method and other methods
(5) Examples of the statement in the views by various methods24

2A.4 Preparing drawings for a flat and thin shape, etc. (sheet-like	Э
shape, etc.)	
2A.5 Preparing other drawings	.27
(1) "Development view of a pattern"	28
(2) "Sectional view"	.29
(3) "End elevational view of the cut part"	.31
(4) "Combined sectional view" and others	
(5) "Enlarged view" and "Enlarged view of a part"	.36
(6) "Perspective view" (excluding isometric projection drawings	,
cabinet drawings, cavalier drawings)	
(7) Drawings of an article that has an opening or separable par	t,
or the shape, etc. of which is changeable	
(8) "Shades" specifying the surface shape of a three-dimensior	nal
object	
(9) Drawings prepared using computer graphics	43
B. Drawings for helping in understanding the design and drawings	;
that represent the transparent part (reference views)	48
2B.1 Reference views indicating functions, etc. of each part	
2B.2 Reference views indicating the state of use	
2B.3 Reference views representing the transparent part	
C. Photographs substituted for drawings	.51
D. Specimens and models	53
Part II How to Represent a Design for which the Design Registration is	;
Requested for a Part of an Article, etc	
1. Statement in the Application	
1.1 The column of "Partial Design"	56
1.2 The column of "Article to the Design"	56
1.3 The column of "Description of Article to the Design"	
1.4 The column of "Description of the Design"	
(1) How to state the method of specifying "the part for which th	
design registration is requested"	
2. The Depiction in Drawings	.59
2.1 How to specify "the part for which the design registration is	
requested"	.59
2.2 How to depict drawings specifically and points to be noted	
(1) How to depict "six views"	.61
(2) How to depict "Sectional view"	.62
(3) The boundary between "the part for which the design	~~
registration is requested" and "any other parts"	
(4) "Enlarged view"	
(5) "Reference view explaining the operative part", etc	.72

(6) "Any other parts"7	73
(7) In cases where the pore portion of an article is requested as	
partial design	
(8) In cases of views in which only "any other parts" appear7	76
2.3 In cases where submitting "models" or "specimens"	
2.4 In cases where submitting "photographs substituted for	
drawings"	۶N
Part III How to Represent the Shape, etc. by Features	
1. Articles Having a Separable Part	
1.1 Designs composed of a main body and a cover	
1.2 Designs having a pair of male and female members	
2. Articles Having an Opening/Closing Member	
2.1 Where both of the opening or closing state of door or cover ca	
be the main state	54
2.2 Where the state in which the cover is closed is the main state	~ -
8	
3. Articles Having a Movable Constituent Part	
3.1 Structure having a movable part	37
3.2 Where the shape, etc. are changeable by the expansion and	
contraction of the whole or part of an article	
4. Articles Having Transparent or Translucent Part) 0
4.1 Difference between "being transparent" and "having	
translucency"	
4.2 Points to be noted when making a statement in the column of	
"Description of the Design" of the application	
4.3 How to specify the transparent part using reference views	91
4.4 How to prepare drawings of the transparent design	92
4.5 How to prepare drawings of articles having translucency9 4.6 How to represent lighting parts	96
4.6 How to represent lighting parts	97
5. 3-D Shaped Article with a Very Thin Thickness	99
6. Long-length Articles10)1
6.1 In cases where a shape or a pattern simply continues 10)1
6.2 In cases where a shape or a pattern repeats continuously 10)3
7. Textiles Such as a Woven Cloth Fabric	
7.1 In cases where a pattern repeats continuously in a single	
direction alone (either vertically or horizontally))5
7.2 In cases where a pattern continues in the four directions (both	
vertically and horizontally)10	
7.3 In cases where a design registration is requested for a part of	а
pattern which repeats continuously	
8. Designs Having an Extremely Long Part	

8.1 How to depict drawings with "the middle part omitted"	
8.2 In cases where the middle part of an extremely long portion	
be omitted	
8.3 Points to be noted in preparing drawings	110
8.4 Points to be noted in making a statement in the column of	
"Description of the Design"	110
8.5 Omitting the depiction of a power source code	112
9. Articles Having Flocked Part or Mesh Fabric Part, etc	113
9.1 In the case of a flocked part	
9.2 In the case of materials such as napped fabric or sponge	114
9.3 In the case of generic fine plain-weave mesh fabric	116
10. Articles Whose Shape, etc. is Changeable	119
11. Wooden Toys or Building Blocks	
12. Combined Articles (e.g. Playing Cards)	
13. Designs for a Single Article that Includes Multiple Constituent	
Objects	122
14. In the Case of a Design Including a Graphic Image on a Screen	124
14.1 Basics of filing an application for a design including a graph	
image	125
(1) Basics of filing an application for a graphic image design	125
(2) Basics of filing an application for a design including a graph	
image on a part of an article, etc.	
(3) Design for a set of articles whose constituent elements	120
include a design including a graphic image	131
(4) Interior design whose constituent elements include a desig	
including a graphic image	
14.2 Representation in drawings according to graphic image	100
	138
(1) Virtual 3D and virtual reality (VR) graphic images	
(2) Graphic images that change	
(3) Where the design cannot be fully understood unless	140
represented together with articles other than the design for wh	lich
the design registration is requested	
(4) In the case of a liquid crystal display panel (where figurative	
segments are arranged in fixed positions)	
(5) Graphic image development views	
15. Building Designs 15.1 Filing an application for each design (one application per	101
	161
design) 15.2 Points to be noted in making statements in the application	101
•	
(1) Statements in the column of "Article to the Design"	102

(2) Statements in the column of "Description of Article to the	
Design" 1	
(3) Statements in the column of "Description of the Design" 1	
15.3 Points to be noted in making statements in drawings, etc 1	63
(1) Where a design registration for inside of a building is	
requested1	64
(2) Buildings comprised of multiple constituent objects 1	64
(3) Indication of view1	64
(4) Perspective drawing method1	64
16. Designs for a Set of Articles1	79
16.1 Points to be noted in making statements in the application 1	79
16.2 Points to be noted in making statements in drawings, etc 1	82
(1) How to depict drawings, etc1	82
(2) Indication of view1	82
17. Interior Designs 1	85
17.1 Filing an application for each design (one application per	
design)1	185
17.2 Points to be noted in making statements in the application 1	87
17.3 Points to be noted in making statements in drawings 1	187
17.4 Feature statements 1	193
