Procedures to file a request to the EGYPO (Egyptian Patent Office) for Patent Prosecution Highway Pilot Program between the EGYPO and the JPO (Japan Patent Office)

Applicants can request accelerated examination by a prescribed procedure including submission of relevant documents on an application which is filed with the EGYPO and satisfies the following requirements under the EGYPO-JPO Patent Prosecution Highway (PPH) pilot program based on the JPO application (Part I) or PCT international work products (Part II).

When filing a request for the PPH pilot program, an applicant must submit a request form to the EGYPO.

The offices may terminate the PPH pilot program if the volume of participation exceeds manageable level, or for any other reason. Ex Ante notice will be published if the PPH pilot program is terminated.

The PPH pilot program will be in effect for three years commencing on June 1, 2020 and will end on May 31, 2023. However, the program may be extended after a joint EGYPO-JPO review and assessment of the program implementation.
1. Requirements

(a) Both the EGYPO application on which PPH is requested and the JPO application(s) forming the basis of the PPH request shall have the same earliest date (whether this be a priority date or a filing date).

For example, the EGYPO application (including PCT national phase application) may be either:

(i) an application which validly claims priority under the Paris Convention from the JPO application(s) (examples are provided in ANNEX I, Figures A, B, C, H, I and J), or

(ii) an application which provides the basis of a valid priority claim under the Paris Convention for the JPO application(s) (including PCT national phase application(s)) (examples are provided in ANNEX I, Figures D and E), or

(iii) an application which shares a common priority document with the JPO application(s) (including PCT national phase application(s)) (examples are provided in ANNEX I, Figures F, G, L, M and N), or

(iv) a PCT national phase application where both the EGYPO application and the JPO application(s) are derived from a common PCT international application having no priority claim (an example is provided in ANNEX I, Figure K).

The EGYPO application, which validly claims priority to multiple JPO or direct PCT applications, or which is the divisional application validly based on the originally filed application that is included in (i) to (iv) above, is also eligible.

The pilot program is not applicable on the basis of JPO ‘utility model’ applications.

(b) At least one corresponding application exists in the JPO and has one or more claims that are determined to be patentable/allowable by the JPO.

The corresponding application(s) can be the application which forms the basis of the priority claim, an application which derived from the JPO application which forms the basis of the priority claim (e.g., a divisional application of the JPO application or an application which claims domestic priority to the JPO application (see Figure C in Annex I), or an JPO national phase application of a PCT application (see Figures J, K, L, M and N in Annex I).

Claims are “determined to be allowable/patentable” when the JPO examiner clearly identified the claims to be allowable/patentable in the latest office action, even if the application is not granted for patent yet.

The office action includes one of the following:

(a) Decision to Grant a Patent

(b) Notification of Reasons for Refusal
(c) Decision of Refusal
(d) Appeal Decision
For example, if the following routine expression is described in the “Notification of Reason for Refusal” of the JPO, those claims are clearly identified to be allowable/patentable.

"<Claims which has been found no reason for refusal>
At present for invention concerning Claim___, no reason for refusal is found."

(c) All claims on file, as originally filed or as amended, for examination under the PPH must sufficiently correspond to one or more of those claims indicated as allowable in the JPO.
Claims are considered to “sufficiently correspond” where, accounting for differences due to translations and claim format, the claims in the EGYPO are of the same or similar scope as the claims in the JPO, or the claims in the EGYPO are narrower in scope than the claims in the JPO. In this regard, a claim that is narrower in scope occurs when a JPO claim is amended to be further limited by an additional feature that is supported in the specification (description and/or claims).
A claim in the EGYPO which introduces a new/different category of claims to those claims indicated as allowable in the JPO is not considered to sufficiently correspond. For example, where the JPO claims only contain claims to a process of manufacturing a product, then the claims in the EGYPO are not considered to sufficiently correspond if the EGYPO claims introduce product claims that are dependent on the corresponding process claims.
Any claims amended or added after the grant of the request for participation in the PPH pilot program need not to sufficiently correspond to the claims indicated as allowable in the JPO application.

(d) The EGYPO has not begun examination of the application at the time of request for the PPH (an example is provided in ANNEX I, figure O).

2. Documents to be submitted
Documents (a) to (d) below must be submitted by attaching to the PPH request.

(a) Copies of all office actions (which are relevant to substantial examination for patentability in the JPO) which were issued for the corresponding application by the JPO, and translations of them¹.

Either Arabic or English is acceptable as translation language. The applicant does not

¹ Machine translations will be admissible, but if it is impossible for the examiner to understand the outline of the translated office action or claims due to insufficient translation, the examiner can request the applicant to resubmit translations.
have to submit a copy of JPO office actions and translations of them when those documents are provided via JPO’s dossier access system because the office actions and their machine translations are available for the EGYPO examiner via the JPO’s dossier access system. If they cannot be obtained by the EGYPO examiner via the JPO’s dossier access system, the applicant may be notified and requested to provide the necessary documents.

(b) Copies of all claims determined to be patentable/allowable by the JPO, and translations of them.

Either Arabic or English is acceptable as translation language. The applicant does not have to submit a copy of claims indicated to be allowable/patentable in the JPO, and translations thereof when the documents are provided via JPO’s dossier access system because they are available for the EGYPO examiner via the JPO’s dossier access system. If they cannot be obtained by the EGYPO examiner via the JPO’s dossier access system, the applicant may be notified and requested to provide the necessary documents.

(c) Copies of references cited by the JPO examiner

If the references are patent documents, the applicant doesn’t have to submit them because the EGYPO usually possesses them. When the EGYPO does not possess the patent document, the applicant has to submit the patent document at the examiner’s request. Non-patent literature must always be submitted. The translations of the references are unnecessary.

(d) Claim correspondence table

The applicant requesting PPH must submit a claim correspondence table, which indicates how all claims in the EGYPO application sufficiently correspond to the patentable/allowable claims in the JPO application. When claims are just literal translation, the applicant can just write down that “they are the same” in the table. When claims are not just literal translation, it is necessary to explain the sufficient correspondence of each claim. When the applicant has already submitted above documents (a) to (d) to the EGYPO through simultaneous or past procedures, the applicant may incorporate the documents by reference and does not have to attach them.
Part II
PPH using the PCT international work products from the JPO

1. Requirements
The application which is filed with the EGYPO and on which the applicant files a request under the PCT-PPH must satisfy the following requirements:

(1) The latest work product in the international phase of a PCT application corresponding to the application ("international work product"), namely the Written Opinion of International Search Authority (WO/ISA), the Written Opinion of International Preliminary Examination Authority (WO/IPEA) or the International Preliminary Examination Report (IPER), indicates at least one claim as patentable/allowable (from the aspect of novelty, inventive steps and industrial applicability).
Note that the ISA and the IPEA which produced the WO/ISA, WO/IPEA and the IPER are limited to the JPO, but, if priority is claimed, the priority claim can be to an application in any Office, see example A' in Annex II (application ZZ can be any national application).
The applicant cannot file a request under PCT-PPH on the basis of an International Search Report (ISR) only.
In case any observation is described in Box VIII of WO/ISA, WO/IPEA or IPER which forms the basis of a PCT-PPH request, the applicant must explain why the claim(s) is/are not subject to the observation irrespective of whether or not an amendment is submitted to correct the observation noted in Box VIII. The application will not be eligible for participating in PCT-PPH pilot program if the applicant does not explain why the claim(s) is/are not subject to the observation. In this regard, however, it does not affect the decision on the eligibility of the application whether the explanation is adequate and/or whether the amendment submitted overcomes the observation noted in Box VIII.

(2) The relationship between the application and the corresponding international application satisfies one of the following requirements:
(A) The application is a national phase application of the corresponding international application. (See Figures A, A', and A” in Annex II)
(B) The application is a national application as a basis of the priority claim of the corresponding international application. (See Figure B in Annex II)
(C) The application is a national phase application of an international application claiming priority from the corresponding international application. (See Figure C in Annex II)
(D) The application is a national application claiming foreign/domestic priority from
Part II PPH using the PCT international work products from the JPO

the corresponding international application. (See Figure D in Annex II)

(E) The application is the derivative application (divisional application and application claiming domestic priority etc.) of the application which satisfies one of the above requirements (A) – (D). (See Figures E1 – E3 in Annex II)

(3) All claims on file, as originally filed or as amended, for examination under the PCT-PPH must sufficiently correspond to one or more of those claims indicated as allowable in the latest international work product of the corresponding international application.

Claims are considered to "sufficiently correspond" where, accounting for differences due to translations and claim format, the claims in the EGYPO are of the same or similar scope as the claims indicated as allowable in the latest international work product, or the claims in the EGYPO are narrower in scope than the claims indicated as allowable in the latest international work product.

In this regard, a claim that is narrower in scope occurs when a claim indicated as allowable in the latest international work product is amended to be further limited by an additional feature that is supported in the specification (description and/or claims).

A claim in the EGYPO which introduces a new/different category of claims to those claims indicated as allowable in the latest international work product is not considered to sufficiently correspond. For example, where the claims indicated as allowable in the latest international work product only contain claims to a process of manufacturing a product, then the claims in the EGYPO are not considered to sufficiently correspond if the EGYPO claims introduce product claims that are dependent on the corresponding process claims.

Any claims amended or added after the grant of the request for participation in the PCT-PPH pilot program need not to sufficiently correspond to the claims indicated as allowable in the latest international work product.

(4) The EGYPO has not begun examination of the application at the time of request for the PCT-PPH.

2. Documents to be submitted

The applicant must submit the following documents attached to the request form in filing a request under PCT-PPH. Some of the documents may not be required to submit in certain cases.

(1) A copy of the latest international work product which indicated the claims to be patentable/allowable and their Arabic or English translations if they are not in English.

In case the application satisfies the relationship 1.(2)(A), the applicant need not submit a copy of the International Preliminary Report on Patentability (IPRP) and any English translations
Part II PPH using the PCT international work products from the JPO

thereof because a copy of these documents is already contained in the file-wrapper of the application. In addition, if the copy of the latest international work product and the copy of the translation are available via “PATENTSCOPE (registered trademark)”\(^2\), an applicant need not submit these documents, unless otherwise requested by the EGYPO.

(WO/ISA and IPER are usually available as “IPRP Chapter I” and “IPRP Chapter II” respectively in 30 months after the priority date.)

Machine translation will be admissible, but if it is impossible for the examiner to understand the outline of the latest translated international work product due to insufficient translation, the examiner can request the applicant to resubmit translations.

(2) A copy of a set of claims which the latest international work product of the corresponding international application indicated to be patentable/allowable and their Arabic or English translations if they are not in English.

If the copy of the set of claims which are indicated to be patentable/allowable is available via “PATENTSCOPE (registered trademark)” (e.g. the international Patent Gazette has been published), an applicant need not submit this document unless otherwise requested by the EGYPO. Where the set of claims is written in Japanese, the translations thereof must be still submitted by an applicant.

Machine translation will be admissible, but if it is impossible for the examiner to understand the outline of the latest translated claims due to insufficient translation, the examiner can request the applicant to resubmit translations.

(3) A copy of references cited in the latest international work product of the international application corresponding to the application.

If the reference is a patent document, the applicant is not required to submit it. In case the EGYPO has difficulty in obtaining the document, however, the applicant may be asked to submit it. Non-patent literature must always be submitted. Translations of cited references are unnecessary.

(4) A claims correspondence table which indicates how all claims in the application sufficiently correspond to the claims indicated to be patentable/allowable.

When claims are just literal translation, the applicant can just write down that “they are the same” in the table. When claims are not just literal translation, it is necessary to explain the sufficient correspondence of each claim based on the criteria 1. (3) (Please refer to the Example form below).

When an applicant has already submitted the above mentioned documents (1) - (4) to the EGYPO through simultaneous or past procedures, the applicant may incorporate the documents by reference and is thus not required to attach the documents.
EGYPO – JPO PPH request form

Subject: Request for an accelerated examination under the PPH pilot program

Date of filing: 

Egypt Application number:

Title of the invention:

Applicant:

Corresponding JPO Application number:

Priority Application number

Documents submitted:

☐ Copies of all office actions (which are relevant to substantial examination for patentability in the JPO) which were issued for the corresponding application by the JPO and translations of them

☐ Copies of all claims determined to be patentable/allowable by the JPO and translations of them

☐ Copies of references cited by the JPO examiner

☐ Claim correspondence table

(A) The application is a national phase application of the corresponding international application.

(A’) The application is a national phase application of the corresponding international application. (The corresponding international application claims priority from a national application.)

ZZ=any office
(A”) The application is a national phase application of the corresponding international application.
(The corresponding international application claims priority from an international application.)

(B) The application is a national application as a basis of the priority claim of the corresponding international application.
(C) The application is a national phase application of an international application claiming priority from the corresponding international application.

(D) The application is a national application claiming foreign/domestic priority from the corresponding international application.
(E1) The application is a divisional application of an application which satisfies the requirement (A).

(E2) The application is an application claiming domestic priority from an application which satisfies the requirement (B).
(E3) The application is an application claiming priority from an application which satisfies the requirement (B).

ZZ : any office
