

Procedures to file a request to the JPO (Japan Patent Office) for Patent Prosecution Highway Program between the JPO and the MyIPO (Intellectual Property Corporation of Malaysia)

Applicants can request accelerated examination by a prescribed procedure including submission of relevant documents on an application which is filed with the JPO and satisfies the following requirements under the JPO-MyIPO Patent Prosecution Highway program based on the MyIPO application.

When filing a request for the PPH program, an applicant must submit a request form “The Explanation of Circumstances Concerning Accelerated Examination” based on the procedure prescribed in “the Guidelines of the Accelerated Examination and Appeal.”¹ Under the PPH program, an applicant is not required to fill in the section “2. the disclosure of prior arts and comparison between the claimed invention and prior art” in “The Explanation of Circumstances Concerning Accelerated Examination”.

The PPH program was commenced on a trial basis on October 1, 2014 and will be fully implemented on a permanent basis on October 1, 2020.

1. Requirements

(a) Both the JPO application on which PPH is requested and the MyIPO application(s) forming the basis of the PPH request shall have the same earliest date (whether this be a priority date or a filing date).

For example, the JPO application (including PCT national phase application) may be either:

(Case I) an application which validly claims priority under the Paris Convention from the MyIPO application(s) (examples are provided in ANNEX, Figures A, B, C, H, I and J), or

(Case II) an application which provides the basis of a valid priority claim under the Paris Convention for the MyIPO application(s) (including PCT national phase application(s)) (examples are provided in ANNEX, Figures D and E), or

(Case III) an application which shares a common priority document with the MyIPO application(s) (including PCT national phase application(s)) (examples are provided in ANNEX, Figures F, G, L, M and N), or

(Case IV) a PCT national phase application where both the JPO application and the MyIPO application(s) are derived from a common PCT international application having no priority claim (an example is provided in ANNEX, Figure K).

Even if an MyIPO application is examined in the MSE route, the JPO application which

¹ <https://www.jpo.go.jp/e/system/patent/shinsa/jp-soki/document/index/guideline.pdf>

PPH using the national work products from the MyIPO

falls into the above case is eligible for PPH request on the condition that examination results for the MSE route are from a JPO's PPH partner Office. (examples are provided in Annex, Figures A', F', and K').

The program is not applicable on the basis of MyIPO 'utility innovation' applications.

(b) At least one corresponding application exists in the MyIPO and has one or more claims that are determined to be patentable/allowable by the MyIPO.

The corresponding application can be the application which forms the basis of the priority claim, an application which derived from the MyIPO application which forms the basis of the priority claim (e.g. a divisional application of the MyIPO application), or an MyIPO national phase application of a PCT application.

Claims are "determined to be allowable/patentable" when the MyIPO examiner clearly identifies the claims to be allowable/patentable in the latest office action, even if the application is not granted for patent yet. The office action may be either:

- (i) Substantive Examination Clear Report
- (ii) Substantive Examination Adverse Report
- (iii) Notice of Refusal

(c) All claims on file, as originally filed or as amended, for examination under the PPH must sufficiently correspond to one or more of those claims indicated as allowable in the MyIPO.

Claims are considered to "sufficiently correspond" where, accounting for differences due to translations and claim format, the claims in the JPO are of the same or similar scope as the claims in the MyIPO, or the claims in the JPO are narrower in scope than the claims in the MyIPO.

In this regard, a claim that is narrower in scope occurs when an MyIPO claim is amended to be further limited by an additional feature that is supported in the specification (description and/or claims).

A claim in the JPO which introduces a new/different category of claims to those claims indicated as allowable in the MyIPO is not considered to sufficiently correspond. For example, where the MyIPO claims only contain claims to a process of manufacturing a product, then the claims in the JPO are not considered to sufficiently correspond if the JPO claims introduce product claims that are dependent on the corresponding process claims.

Any claims amended or added after the grant of the request for participation in the PPH program need not to sufficiently correspond to the claims indicated as allowable in the MyIPO application.

(d) The JPO has not begun examination of the application at the time of request for

the PPH (an example is provided in ANNEX, figure O).

(e) A “Request for Substantive Examination” must have been filed at the JPO either at the time of the PPH request or previously.

2. Documents to be submitted

Documents (a) to (d) below must be submitted by attaching to “The Explanation of Circumstances Concerning Accelerated Examination”.

Note that even when it is not needed to submit documents below, the name of the documents must be listed in “The Explanation of Circumstances Concerning Accelerated Examination” (Please refer to the Example form for the detail).

(a) Copies of all office actions

(i) Where the application of MyIPO was examined in the ordinary route, copies of all actions (which are relevant to substantial examination for patentability), which were sent for the corresponding application by the MyIPO, and translations of them² must be submitted.

Both Japanese and English are acceptable as translation languages.

(ii) Where the application of MyIPO was examined in the MSE route, copies of all actions (which are relevant to substantial examination for patentability) which have been issued by the prescribed patent office for the corresponding application filed at the USPTO, the UK-IPO, the IP Australia, the EPO and the KIPO as the prescribed patent office referred to in the Malaysian patent legislation.

There is no need to submit copies of office actions if they are available from the Dossier Access Systems (USPTO: PAIR, UK-IPO: IPSUM, IP Australia: AusPat, EPO: European Patent Register, KIPO: K-PION). Both Japanese and English are acceptable as translation languages.

(b) Copies of all claims determined to be patentable/allowable by the MyIPO, and translations of them².

Either Japanese or English is acceptable as translation language.

(c) Copies of references cited by the MyIPO examiner where the application of MyIPO was examined in the ordinary route, or by the examiner of the above prescribed patent office where the application of MyIPO was examined in the MSE route.

² Machine translations will be admissible, but if it is impossible for the examiner to understand the outline of the translated office action or claims due to insufficient translation, the examiner can request the applicant to resubmit translations.

If the references are patent documents, the applicant doesn't have to submit them because the JPO usually possesses them. When the JPO does not possess the patent document, the applicant has to submit the patent document at the examiner's request. Non-patent literature must always be submitted.

The translations of the references are unnecessary.

(d) Claim correspondence table

The applicant requesting PPH must submit a claim correspondence table, which indicates how all claims in the JPO application sufficiently correspond to the patentable/allowable claims in the MyIPO application.

When claims are just literal translation, the applicant can just write down that "they are the same" in the table. When claims are not just literal translation, it is necessary to explain the sufficient correspondence of each claim based on the criteria 1. (c) (Please refer to the Example form).

When the applicant has already submitted above documents (a) to (d) to the JPO through simultaneous or past procedures, the applicant may incorporate the documents by reference and does not have to attach them.

3. Example of "The Explanation of Circumstances Concerning Accelerated Examination" for filing request an accelerated examination under the PPH program

(1) Circumstances

When an applicant files a request for an accelerated examination under the PPH program to the JPO, an applicant must submit a request form "The Explanation of Circumstances Concerning Accelerated Examination" based on the procedure prescribed in "the Guidelines of the Accelerated Examination and Appeal"³.

The applicant must indicate that the application is included in (i) to (iv) of 1. (a), and that the accelerated examination is requested under the PPH program. The application number, publication number, or a patent number of the corresponding MyIPO application(s) also must be written.

*In the case that the application which has one or more claims that are determined to be patentable/allowable is different from the MyIPO application(s) included in (i) to (iv) of 1. (a) (for example, the divisional application of the basic application), the application

³ <https://www.ipa.go.jp/e/system/patent/shinsa/jp-soki/document/index/guideline.pdf>

number, publication number, or a patent number of the application(s) which has claims determined to be patentable/allowable and the relationship between those applications also must be written.

(2) Documents to be submitted

The applicant must list all required documents mentioned above 2. in an identifiable way, even when applicant omits to submit certain documents.

(3) Notice

Forms of “The Explanation of Circumstances Concerning Accelerated Examination” are different between on-line procedure and paper procedure. Please refer to the examples of forms when filling in (“Form 1 for Accelerated Examination” for on-line procedures, and “Form 2 for Accelerated Examination” for paper procedures.).

Example form of on-line procedures

(Example of the request based on the claims indicated patentable/allowable in the written opinion of the report on the state of the art)

<p>【書類名】 早期審査に関する事情説明書 The name of this paper</p>
