

**Procedures to file a request to the IMPI for Patent Prosecution Highway Pilot Program
between the IMPI (Instituto Mexicano de la Propiedad Industrial) and the JPO (Japan Patent
Office)**

Part I

PPH using the national work products from the JPO

Applicants can request accelerated examination by a prescribed procedure including submission of relevant documents on an application which is filed with the IMPI and satisfies the following requirements under the IMPI-JPO Patent Prosecution Highway (PPH) pilot program.

When filing a request for the PPH pilot program, an applicant must submit a free style writing before the Institute. (See section 3)

1. Requirements

- (a) Both the IMPI application on which PPH is requested and the JPO application(s) forming the basis of the PPH request shall have the same earliest date (whether this be a priority date or a filing date).**

For example, the IMPI application (including PCT national phase application) may be either:

Case I: an application which validly claims priority under the Paris Convention from the JPO application(s) (examples are provided in ANNEX I, Figures A, B, C, H, I and J), or

Case II: an application which provides the basis of a valid priority claim under the Paris Convention for the JPO application(s) (including PCT national phase application(s)) (examples are provided in ANNEX I, Figures D and E), or

Case III: an application which shares a common priority document with the JPO application(s) (including PCT national phase application(s)) (examples are provided in ANNEX I, Figures F, G, L, M and N), or

Case IV: a PCT national phase application where both the IMPI application and the JPO application(s) are derived from a common PCT international application having no priority claim (an example is provided in ANNEX I, Figure K).

- (b) At least one corresponding application exists in the JPO and has one or more claims that are determined to be patentable/allowable by the JPO.**

The corresponding application(s) can be the application which forms the basis of the priority claim, an application which derived from the JPO application which forms the basis of the priority claim (e.g., a divisional application of the JPO application or an application

Part II PPH using the PCT international work products from the JPO

which claims domestic priority to the JPO application (see Figure C in Annex I)), or an JPO national phase application of a PCT application (see Figures J, K, L, M and N in Annex I). Claims are “determined to be patentable/allowable” when the JPO examiner clearly identified the claims to be patentable/allowable in the latest office action, even if the application is not granted for patent yet.

The office action includes:

- (a) Decision to Grant a Patent
- (b) Notification of Reasons for Refusal
- (c) Decision of Refusal
- (d) Appeal Decision

For example, if the following routine expression is described in the “Notification of Reason for Refusal” of the JPO, those claims are clearly identified to be patentable/allowable.

“<Claims which has been found no reason for refusal>

At present for invention concerning Claim__, no reason for refusal is found.”

- (c) All claims on file as originally filed or as amended for examination under the PPH, must sufficiently correspond to one or more of those claims indicated as allowable in the JPO.**

Claims are considered to “sufficiently correspond” where, accounting for differences due to translations and claim format, the claims in the IMPI are of the same or similar scope as the claims in the JPO, or the claims in the IMPI are narrower in scope than the claims in the JPO.

In this regard, a claim that is narrower in scope occurs when a JPO claim is amended to be further limited by an additional feature that is supported in the specification (description and/or claims).

A claim in the IMPI which introduces a new/different category of claims to those claims indicated as allowable in the JPO is not considered to sufficiently correspond. For example, the JPO claims only contain claims to a process of manufacturing a product, then the claims in the IMPI are not considered to sufficiently correspond if the IMPI claims introduce product claims that are dependent on the corresponding process claims.

Any claims amended or added after the submission of the request for participation in the PPH pilot program but before the first IMPI action must sufficiently correspond to the claims indicated as patentable/allowable in the JPO application. Any claims amended or

added after the first IMPI action need not to sufficiently correspond to the claims indicated as patentable/allowable in JPO in order to overcome the reasons for refusal raised by IMPI examiner.

- (d) The IMPI has not begun examination of the application at the time of request for the PPH. (See Figure O in ANNEX I)**

2. Documents to be submitted

Documents (a) to (d) below must be submitted by attaching to the PPH request.

- (a) Copies of all office actions (which are relevant to substantial examination for patentability in the JPO) which were issued for the corresponding application by the JPO, and translations of them¹.**

The applicant does not have to submit a copy of JPO office actions and translations of them when the office actions are provided via AIPN (JPO's dossier access system). If the office actions cannot be obtained by the IMPI examiner via the AIPN, the applicant may be notified and requested to provide the necessary documents.

- (b) Copies of all claims determined to be patentable/allowable by the JPO, and translations of them.**

The applicant not need to submit a copy of claims indicated to be patentable/allowable in the JPO and translations thereof when the claims are provided via AIPN (JPO's dossier access system). If the claims cannot be obtained by the IMPI examiner via the AIPN, the applicant may be notified and requested to provide the necessary documents.

- (c) Copies of references cited by the JPO examiner**

If the references are patent documents, the applicant does not have to submit them because the IMPI usually possesses them. When a patent document is not available to the IMPI examiner, the applicant must submit it at the examiner's request. Non-patent literature must always be submitted.

The translations of the references are unnecessary

- (d) Claim correspondence table**

The applicant requesting PPH must submit a claim correspondence table, which indicates how all claims in the IMPI application sufficiently correspond to the patentable/allowable

¹ Machine translations will be admissible, but if it is impossible for the examiner to understand the outline of the translated office action or claims due to insufficient translation, the examiner can request the applicant to resubmit translations.

claims in the JPO application.

When claims are just literal translation, the applicant can just write down that “they are the same” in the table. When claims are not just literal translation, it is necessary to explain the sufficient correspondence of each claim.

When the applicant has already submitted above documents (a) to (d) to the IMPI through simultaneous or past procedures, the applicant may incorporate the documents by reference and does not have to attach them.

3. Sample text for participating under the PPH pilot program.

(a) The circumstances

When an applicant files a petition for an accelerated examination under the PPH before IMPI, the applicant shall submit his application in writing explaining the circumstances for its participation, according to the guidelines described in this document.

The applicant shall indicate that the application is included in cases (I) to (IV) of section 1 (a), and that the accelerated examination is requested under the PPH pilot program. The application number, publication number, or patent number of the corresponding JPO application(s) also shall be presented.

In the event that the JPO application which has one or more claims that are determined to be patentable/allowable does not directly belong to any of the cases (I) to (IV) of section 1 (a) (for example, a divisional application of the initial application), the application number, publication number or patent number of the application(s) which contains patentable/allowable claims and the relationship among these applications must also be explained in the writing.

(b) Documents to be submitted

The applicant must list all required documents in section 2, on an identifiable way, even if the applicant omits to submit certain documents.

4. Procedure for the accelerated examination under the PPH Pilot Program

When the request for participation in the PPH pilot program comply with all the above requirements, it will be accepted and IMPI patent application may be advanced out of turn for examination, provided it complies with the publication established in Article 52 of the LPI and upon expiration of the period for third parties observations referred to in Article 52 bis of the LPI.

If the PPH request is filed before the expiration of the time period indicated above, IMPI shall determine whether the patent application may be entitled for accelerated examination under the PPH until this period ends.

In those instances where the request for participation in the PPH pilot program is not accepted because it does not meet all the above requirements, the applicant will be notified and the defects in the request will be identified. The applicant may resubmit the request up to one more time with the specified defects corrected.

If the second request submitted is not accepted, the applicant will be notified and the patent application will await their normal turn of examination.

IMPI will not notify the applicant of the acceptance for assigning a special status for accelerated examination under the PPH, but instead the applicant will be aware by the reception of an office action of substantive examination procedure resulting from accelerated examination.

Applications for utility models and industrial designs, as well as claims of patent applications containing material considered not patentable in accordance with Articles 4, 16 and 19 of the LPI are not subject to participation in the PPH pilot program.

The acceptance of a participation request in the PPH pilot program in a parent application will not carry over to a divisional application. The applicant must submit a new request of participation in the PPH pilot program for the divisional application and fulfill all the conditions set forth above in order to be accepted.

If any of the documents identified in 2 (a) to 2 (d) above has already been filed in the IMPI application, prior to the request for participation in the PPH pilot program, it will not be necessary for the applicant to resubmit these documents with the request for participation. The applicant may simply refer to these documents and indicate in the request for participation in the PPH pilot program when these documents were previously filed in the IMPI application.

Part II PPH using the PCT international work products from the JPO

All the correspondence concerning the accelerated examination procedure is presented at the IMPI, must be clearly identified as relating to a PPH request to ensure that the correspondence is correctly processed. For these purposes, please prominently mark each page of the covering letter of the correspondence with the term "PPH".

It is recommended that when requesting accelerated examination under the PPH, applicants should not only focus on the claims, but on the application as a whole. The applicant should review the complete application and make the necessary amendments to be consistent all the information in the application, without adding new matter to the originally filed.

It is noted that all the amendments made to the application in order to be examined under the PPH will be entered regardless of whether the request for participation in the PPH pilot program is accepted or not.

The PPH program does not absolve applicants of all their duties under the Mexican Industrial Property Law and applicable legislation. Applicants must act in good faith, including the submission of information known by them to IMPI, which is relevant to determine the patentability of the invention.

Part II

PPH using the PCT international work products from the JPO

Applicants can request accelerated examination by a prescribed procedure including submission of relevant documents on an application which is filed with the IMPI and satisfies the following requirements under the IMPI-JPO Patent Prosecution Highway pilot program based on PCT international work products (PCT-PPH pilot program).

When filing a request for the PCT-PPH pilot program, an applicant must submit a free style writing before the IMPI. (See section 3).

1. Requirements

The application which is filed with the IMPI and on which the applicant files a request under the PCT-PPH must satisfy the following requirements:

- (a) The latest work product in the international phase of a PCT application corresponding to the application ("international work product"), namely the Written Opinion of**

International Search Authority (WO/ISA), the Written Opinion of International Preliminary Examination Authority (WO/IPEA) or the International Preliminary Examination Report (IPER), indicates at least one claim as patentable/allowable (from the aspect of novelty, inventive steps and industrial applicability).

Note that the ISA and the IPEA which produced the WO/ISA, WO/IPEA and the IPER are limited to the JPO, but, if priority is claimed, the priority claim can be to an application in any Office, see example A' in Annex II (application ZZ can be any national application).

The applicant cannot file a request under PCT-PPH on the basis of an International Search Report (ISR) only.

In case any observation is described in Box VIII of WO/ISA, WO/IPEA or IPER which forms the basis of a PCT-PPH request, the applicant must explain why the claim(s) is/are not subject to the observation irrespective of whether or not an amendment is submitted to correct the observation noted in Box VIII. The application will not be eligible for participating in PCT-PPH pilot program if the applicant does not explain why the claim(s) is/are not subject to the observation. In this regard, however, it does not affect the decision on the eligibility of the application whether the explanation is adequate and/or whether the amendment submitted overcomes the observation noted in Box VIII.

(b) The relationship between the application and the corresponding international application satisfies one of the following requirements:

- (A) The application is a national phase application of the corresponding international application. (See Figures A, A', and A'' in Annex II)
- (B) The application is a national application as a basis of the priority claim of the corresponding international application. (See Figure B in Annex II)
- (C) The application is a national phase application of an international application claiming priority from the corresponding international application. (See Figure C in Annex II)
- (D) The application is a national application claiming foreign/domestic priority from the corresponding international application. (See Figure D in Annex II)
- (E) The application is the derivative application (divisional application and application claiming domestic priority etc.) of the application which satisfies one of the above requirements (A) – (D). (See Figures E1 and E2 in Annex II)

(c) All claims on file, as originally filed or as amended, for examination under the PCT-PPH must sufficiently correspond to one or more of those claims indicated as

patentable/allowable in the latest international work product of the corresponding international application.

Claims are considered to “sufficiently correspond” where, accounting for differences due to translations and claim format, the claims of the application are of the same or similar scope as the claims in the latest international work product, or the claims of the application are narrower in scope than the claims in the latest international work product.

In this regard, a claim that is narrower in scope occurs when a claim indicated as patentable/allowable in the latest international work product is amended to be further limited by an additional feature that is supported in the specification (description and/or claims).

A claim of the application which introduces a new/different category of claims to those claims indicated as patentable/allowable in the latest international work product is not considered to sufficiently correspond. For example, the claims indicated as allowable in the latest international work product only contain claims to a process of manufacturing a product, then the claims of the application are not considered to sufficiently correspond if the claims of the application introduce product claims that are dependent on the corresponding process claims.

Any claims amended or added after the submission of the request for participation in the PCT-PPH pilot program but before the first IMPI action must sufficiently correspond to the claims indicated as patentable/allowable in the latest international work product. Any claims amended or added after the first IMPI action need not to sufficiently correspond to the claims indicated as patentable/allowable in the latest international work product in order to overcome the reasons for refusal raised by IMPI examiner.

(d) The IMPI has not begun examination of the application at the time of request under PCT-PPH (See Figure F in Annex II)

2. Documents to be submitted

The applicant must submit the following documents attached to the request form in filing a request under PCT-PPH. Some of the documents may not be required to submit in certain cases.

(a) A copy of the latest international work product which indicated the claims to be patentable/allowable and their translations.

In case the application satisfies the relationship 1.(b) (A), the applicant need not submit a copy of the International Preliminary Report on Patentability (IPRP) and any translations thereof because a copy of these documents is already contained in the file-wrapper of the application.

In addition, if the copy of the latest international work product and the copy of the translation are available via “PATENTSCOPE (registered trademark)”², an applicant need not submit these documents, unless otherwise requested by the IMPI.

(WO/ISA and IPER are usually available as “IPRP Chapter I” and “IPRP Chapter II” respectively in 30 months after the priority date.)

(b) A copy of a set of claims which the latest international work product of the corresponding international application indicated to be patentable/allowable and their translations.

If the copy of the set of claims which are indicated to be patentable/allowable is available via “PATENTSCOPE (registered trademark)” (e.g. the international Patent Gazette has been published), an applicant not need to submit this document unless otherwise requested by the IMPI. Where the set of claims is written in Japanese, the translations thereof must be still submitted by an applicant.

(c) A copy of references cited in the latest international work product of the international application corresponding to the application.

If the reference is a patent document, and it is not available to IMPI, this may be requested to applicant. Non-patent literature must always be submitted. Translations of cited references are unnecessary.

(d) A claims correspondence table which indicates how all claims in the application sufficiently correspond to the claims indicated to be patentable/allowable

When claims are just literal translation, the applicant can just write down that “they are the same” in the table. When claims are not just literal translation, it is necessary to explain the sufficient correspondence of each claim based on the criteria 1. (c) (Please refer to the Example form below).

When an applicant has already submitted the above mentioned documents (a) - (d) before the IMPI through simultaneous or past procedures, the applicant may incorporate the documents by reference and is thus not required to attach the documents.

3. Sample text for participating under the PCT-PPH pilot program.

(a) The circumstances

² <http://www.wipo.int/pctdb/en/index.jsp>

Part II PPH using the PCT international work products from the JPO

When an applicant files a petition for an accelerated examination under the PCT-PPH before the IMPI, the applicant shall submit his application in writing explaining the circumstances for its participation, according to the guidelines described in this document.

The applicant shall indicate that the request is included in subparagraphs (A) to (E) of section 1 (b), and that the accelerated examination is requested under the PCT-PPH pilot program. The international application number or the international publication number also shall be presented.

In the event that the international application which has one or more claims that are determined to be patentable/allowable does not directly belong to any of the subparagraphs (A) to (D) of section 1 (b) (for example, a divisional application of the initial application, subparagraph E), the international application number or the international publication number of the international application(s) which contains patentable/allowable claims and the relationship among these applications must also be explained in the writing.

(b) Documents to be submitted

The applicant must list all required documents in section 2, on an identifiable way, even if the applicant omits to submit certain documents.
