

# **International Symposium on Intellectual Property**

## **WIPO GREEN Presentation**

Amy Dietterich  
Director, Global Challenges Division  
World Intellectual Property Organization (WIPO)

**Online  
June 18, 2021**

**[www.wipo.int/green](http://www.wipo.int/green)**

# **WIPO GREEN**

## **Presentation outline:**

- 1- What is WIPO GREEN?**
- 2- Yesterday**
- 3- Today**
- 4- Tomorrow**

# WIPO GREEN

Online platform for accelerated adaptation, adoption, and deployment of green technology solutions

Connects seekers of environmentally sustainable solutions with technology and service providers

**Enable** adaptation and deployment of green solutions through a transparent database

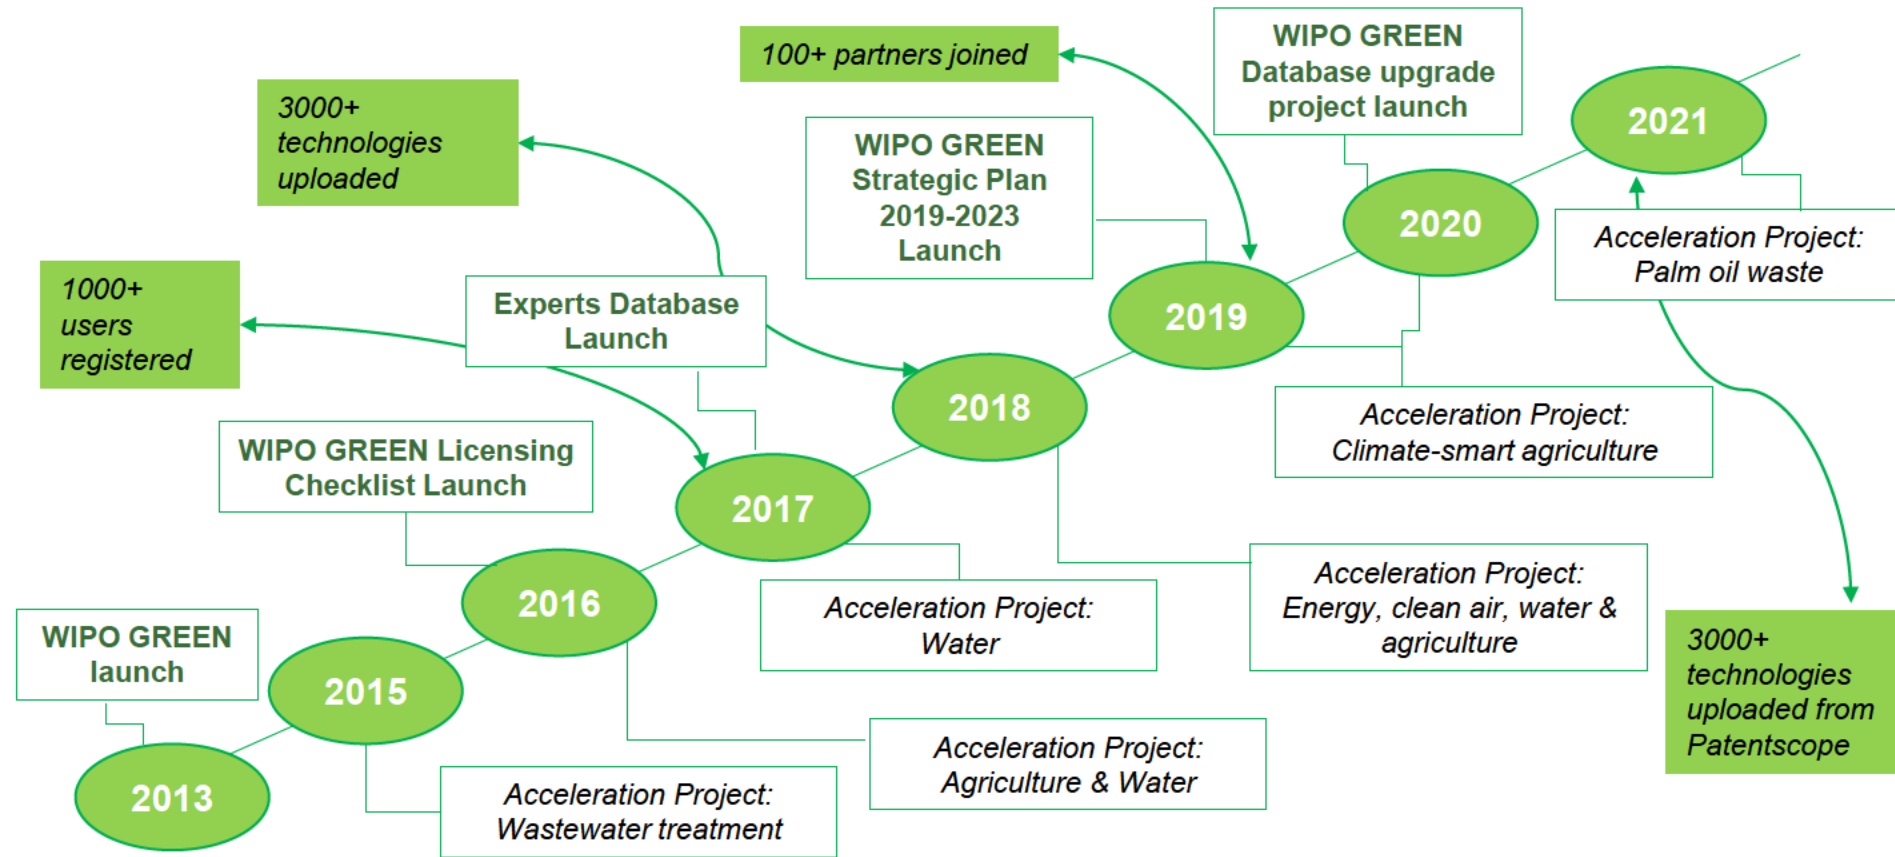

**Engage** with private sector

**Contribute** to global policy dialogue

# WIPO GREEN: brief history

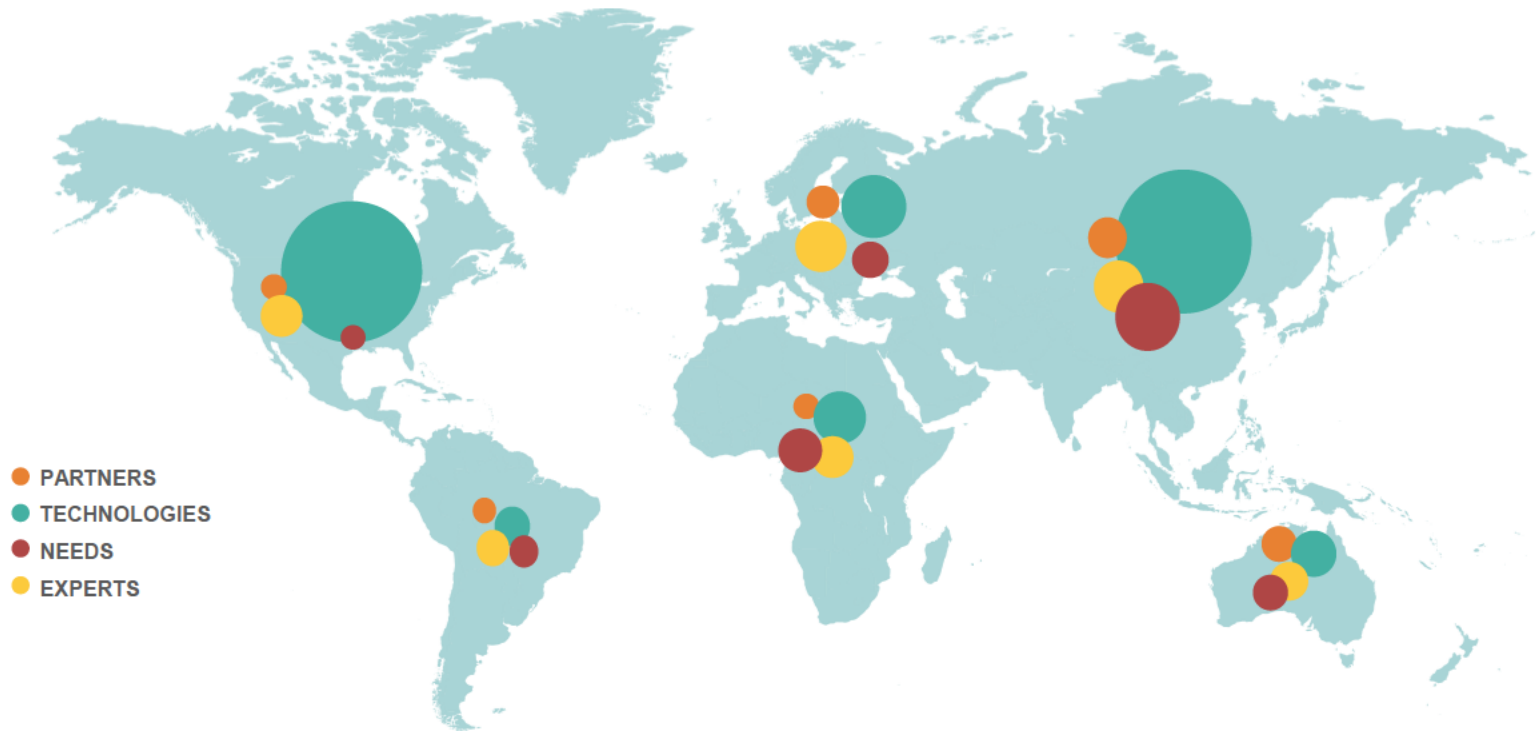

# WIPO GREEN Highlights 2020

- **166,000+** Page views (*80,000+ in 2019*)
  - **120,000+** Unique page views (*60,000+ in 2019*)
  - **7,400+** Newsletter subscribers (*6,700+ in 2019*)
- 
- **3,750+** Technologies, needs and experts (*3,100+ in 2019*)
  - **780+** Connections (*678+ in 2019*)
  - **118** Partners (*100 in 2019*)
  - **50** News items published (*15 in 2019*)

# WIPO GREEN Global – 126 partners

**1,800+**  
REGISTERED  
USERS

**6,500+**  
TECHNOLOGIES  
UPLOADED

**250+**  
NEEDS

# WIPO GREEN partners by category

# Regional distribution of users

# Partner contributions

## Submissions per year

## Submissions per category

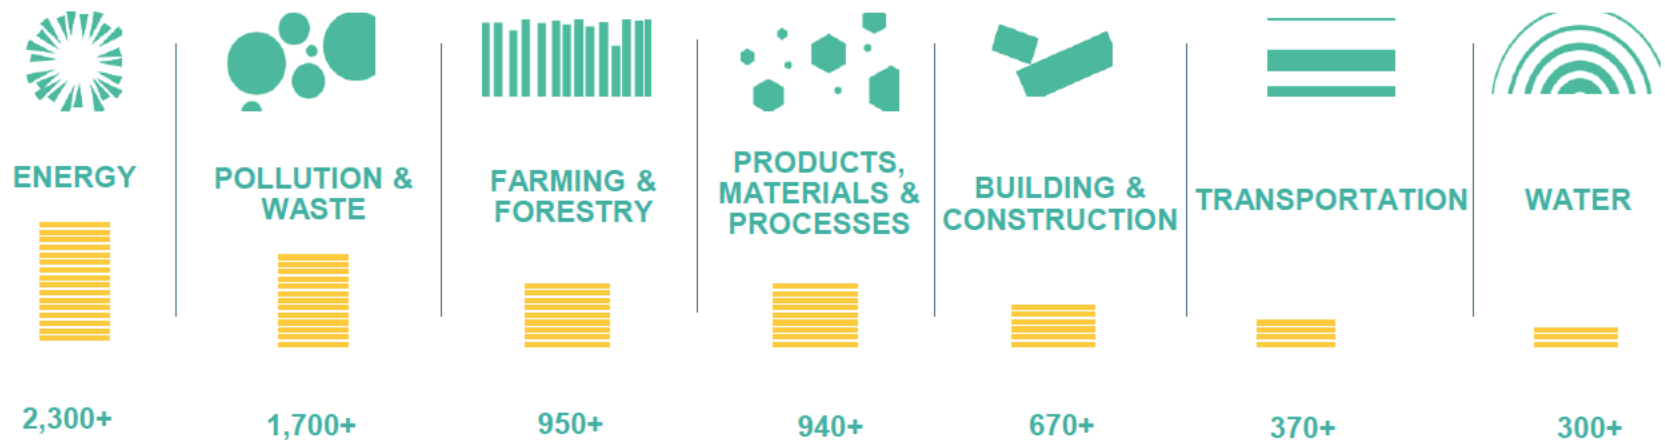

# WIPO GREEN Database Highlights

**6,500+ technologies**

**250+ needs**

- Increase in number of registered users from 1,417 in 2019 to 1,717 in 2020 (20+%)

# Pollution & Waste

- Air
- Solid waste treatment
- Waste water treatment
- Recycling & reuse
- Carbon capture & storage
- Waste disposal
- Land
- Waste avoidance
- Bio-remediation
- Waste collection & transport
- Measuring & monitoring green house gasses
- Pollution detection, measurement & monitoring
- Food waste
- Cleaner coal
- Composting
- ICT in pollution & waste management

## Bi-Modal Real-Time Air Quality Solution

By Clarity & Ramboll  
(China, 2020)

### Scalable air quality monitoring:

Street by street atmospheric pollution data

Rigorous and robust modeling

Forecast peak pollution events

**WIPO | GREEN**

The Marketplace  
for Sustainable Technology

# Farming & Forestry

- Farming technologies
- Improved farm inputs
- Forest production (silviculture)
- Fish farming (aquaculture)
- Forest, biodiversity & ecosystem restoration/conservation
- Food processing
- Irrigation
- Hazard prevention & early warning systems
- Plant & livestock varieties
- Soil improvement
- Harvest & storage
- Stress tolerant cultivation
- Livestock
- ICT in farming
- Land use management
- GIS & Earth observation

## Fruit care biospray By Cultiva (USA, 2020)

### Protective shield:

Improves fruit quality and yields  
Prolongs shelf life and avoid food waste  
Safe ingredients

# Success stories

## Leveraging micropayment technology to increase access to safe drinking water

Through this collaboration, Cubo and Susteq plan to bring safe drinking water to over 20,000 beneficiaries in Nigeria and Kenya by 2019, with the possibility to extend their impact in countries like Senegal and India in the near future.

Prices are kept down by combining the low treatment and operation cost of Cubo's equipment with the simplicity and security of the micropayment system developed by Susteq.

# Success stories

## Using innovative technology to educate future changemakers

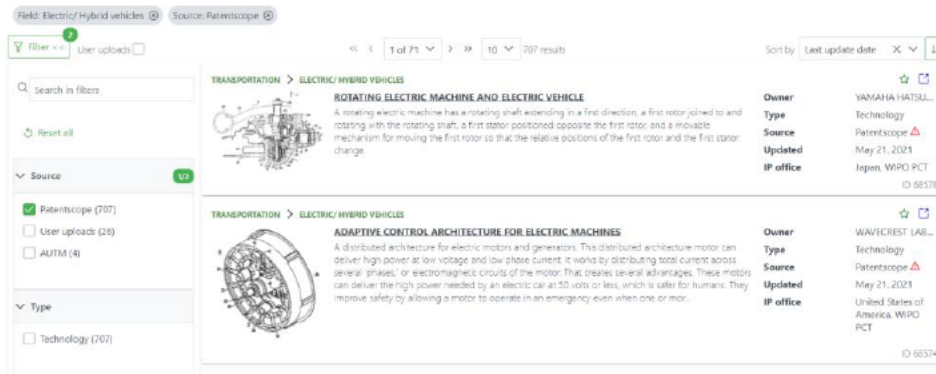

WIPO GREEN matchmaking helped the Innovation Hub of Bali's multi-awarded Green School establish a collaboration with the US-born company Zero Mass Water to bring sustainable drinking water to its students, thus continuing in its mission to raise awareness on environmental challenges and green solutions.

## Fujitsu concludes green technology licensing agreements

Fujitsu signed intellectual property (IP) licensing agreements for two technologies with Kyushu University and University of the Ryukyus.

# Platform upgrade

Saved Searches					
Id	Caption	Type	Updated On	Actions	
20376	Air clean	SIMPLE	May 4, 2021		
20267	Anagea	SIMPLE	Apr 22, 2021		
20266	anagea	SIMPLE	Apr 22, 2021		
Start over a new search.					

- New database launched
- Still hybrid between old and new that gradually will transform
- New search interface (simple, advanced, full-text AI assisted)
- Saved searched + alert, bookmarks, my submissions, profile page with permissions
- New filter options
- New list and details screens
- Simplified user registration

# Platform upgrade – what's next

- Continuous improvements
- Full Patentscope imports
- Patent2solutions (AI assisted search)
- Featured articles (needs, technologies, knowledge material etc.)
- User-dashboard
- Auto-matching
- Collections
- Integration of experts database

WATER > WATER TREATMENT

## EcoMBR: Energy-saving Membrane Bioreactor Using Ozonated Water to Clean Membrane Filter

The EcoMBR is able to achieve a high-quantity flux, or quantity of permeated water per membrane surface area, that is more than twice the rate of conventional MBRs. The key is regularly backwashing the membranes with highly concentrated ozonated water to remove virtually all organic foulants, thereby increasing membrane permeability. In addition, the EcoMBR lowers energy consumption by using a reduced flow rate for air bubbles that are emitted from a blower to clean the membrane surfaces. The EcoMBR also enables the use of fewer membranes, resulting in smaller plant and system footprints.

**TECHNOLOGY FEATURES**

Resources to be saved or improved	Water
Technology type	Solid Fuel
Technology categories	Water > Water treatment
Benefits	

The EcoMBR efficiently removes foulants from the membrane filter through repeated washing with ozonated

# Looking ahead

- What will it take to get the global IP community behind WIPO GREEN?
- Deeper, more meaningful, purposeful, value-added engagement; it is what you make it.
- Defining challenges and addressing them: Stimulating demand, relevance for developing countries, leveraging the IP niche while going beyond
- Supporting new ways of innovating together, and improving access to funding by connecting entrepreneurs with capital and investors to connections established through WIPO GREEN.
- Directly and actively supporting the UNFCCC Technology Mechanism and SDGs (walking the IP and innovation talk)
- Learning, evolving, demonstrating the power of IP and innovation to help address climate change

**Thank you!**
